Quality of Higher Education Yihuan Zou, 2022-09-01 Quality in higher education was not invented in recent decades universities have always possessed mechanisms for assuring the quality of their work The rising concern over quality is closely related to the changes in higher education and its social context Among others the most conspicuous changes are the massive expansion diversification and increased cost in higher education and new mechanisms of accountability initiated by the state With these changes the traditional internally enacted academic quality keeping has been given an important external dimension quality assurance which requires higher education institutions to continuously demonstrate and improve performance and which also provides new systems of rewards and sanctions However the complex impacts of quality assurance policies have shown a need to further understand the quality issue in higher education This book is about constructing a more inclusive understanding of quality in higher education through combining the macro meso and micro levels i e from the perspectives of national policy higher education institutions as organizations in society individual teaching staff and students It covers both theoretical constructions for understanding quality and empirical investigation in the Chinese context The questions addressed are How is quality of higher education perceived by the institution teaching staff

and students respectively What are the main concerns for the institution teaching staff and students in their own pursuit of quality It has been concluded that quality of higher education is not only about educational quality but also about expanding life chances for the students prosperity in the administrative system for the teaching staff and organizational prosperity for the institution With regard to quality assurance and accountability in higher education special attention should be given to the values pursued and be careful to balance between immediate single value efficiency and sustainable development and a wider range of values that higher education serves Quality in the Early Years Emma Slaughter,2016-05-16 The term quality is frequently used in early years practice both in professional discussions and in key policy and literature but often without question or an agreed understanding of what quality is and as though it is an entirely unproblematic concept Through a series of inspiring and thought provoking chapters this book supports you in considering and developing your own notion of quality early years practice across a broad range of key strands of early years provision from the environment to policies from work with vulnerable children and babies to curriculum and research This book helps you to construct your own idea of quality and challenges you to develop your own understanding through stimulating discussion and reflection points A key argument is that whilst there are several indicators and measures of quality there is no one universally agreed definition of quality in early years provision and hence developing your own notion of quality and working towards that with others is paramount Key features include Consideration of what quality looks like within a contemporary early years landscape How you might deliver quality practice when other influences might appear to hinder or contradict this Reflection points to help you embed and link your learning to practice A graduated approach for a greater depth of engagement with the topic and relevant literature With each chapter written by an early years expert Quality in the Early Years is a vital companion for those studying towards any early years qualification as well as established practitioners and leaders within the field
