Between Development and Underdevelopment Jean Batou, 1991 Res en ingl s y franc s **Food Security, Agricultural Policies and Economic Growth** Niek Koning, 2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today s unstable global political situation *The Economic Development of the Third World Since 1900* Paul Bairoch, 2013-11-05 First published in 1967 Professor Bairoch s *Diagnostic de L Evolution Economique du Tiers Monde* has gone into four editions and has brought the author an international reputation This English translation is in effect another edition based on the latest French text but incorporating much which is not to be found there The statistical tables have been revised and expanded wherever possible to include figures up to the end of 1972 the bibliography has been specially adapted to include the literature on the subject in the English language and two new chapters have been written Chapter 8 on Urbanization and Chapter 9 on The labour force and employment It has been Professor Bairoch s aim in this book to examine the development of under developed countries including China during the present century and through the use of comparative statistics to formulate a diagnosis of their growth His analysis includes whenever relevant a comparison between the present economic progress of Third World countries and that of the developed countries at the time of their take off Special attention has also been given to China s unique path of development In the course of his research the author has elaborated several new series The production of these new series and their integration with existing data make this book a valuable quantitative economic history of the Third World African Social Studies C W Gutkind, Peter Waterman, 1977

African Social Studies A Radical Reader is an essential and wide ranging collection of essays by some of the world's finest social scientists known and lesser known This impressive collection covers issues such as the legacy of colonialism imperialism problems in the field of African Studies national liberation movements and more No student of Africa should be without this volume The Modern World-system Immanuel Maurice Wallerstein, 1974 The Modern World System Immanuel Wallerstein's influential multivolume reinterpretation of global history traces the emergence and development of the modern world from the sixteenth century to the twentieth From publisher's description **Growth, Crisis, Democracy** Hideko Magara, Bruno Amable, 2017-07-14 Since the global financial crisis of 2008 advanced economies have been making various efforts to overcome the economic impasse While the contrast between the countries that have escaped from the crisis relatively quickly and those still suffering from serious problems is becoming clearer a new economic crisis stemming from newly emerging economies has again impacted advanced economies In retrospect both leftist and rightist governments in advanced economies pursued expansive macroeconomic and welfare policies from the post WWII period to the oil shocks of the 1970s While we recognise that the particular policy regime in this Golden Decades during which the left and the right implemented similar policies cross nationally were characterised by outstanding economic growth in each country the specific growth patterns varied across countries Different social coalitions underpinned different growth models This book is premised on tentative conclusions that Magara and her research collaborators have reached as a result of three years of study related to our previous project on economic crises and policy regimes Recognising the need to analyse fluid and unstable situations we have set up a new research design in which we emphasise political variables whether political leaders and citizens can overcome the various weaknesses inherent in democracy and escape from an economic crisis by establishing an effective social coalition A new policy regime can be stable only if it is supported by a sufficiently large coalition of social groups whose most important policy demands are satisfied within the new policy regime *Within the Plantation Household* Elizabeth Fox-Genovese, 2000-11-09 Documenting the difficult class relations between women slaveholders and slave women this study shows how class and race as well as gender shaped women's experiences and determined their identities Drawing upon massive research in diaries letters memoirs and oral histories the author argues that the lives of antebellum southern women enslaved and free differed fundamentally from those of northern women and that it is not possible to understand antebellum southern women by applying models derived from New England sources **Great Divergence and Great Convergence** Leonid Grinin, Andrey Korotayev, 2015-05-09 This new monograph provides a stimulating new take on hotly contested topics in world modernization and the globalizing economy It begins by situating what is called the Great Divergence the social technological revolution that led European nations to outpace the early dominance of Asia in historical context over centuries This is contrasted with an equally powerful Great Convergence the recent economic and technological expansion taking place in Third World nations and characterized by narrowing inequity among nations They are seen here as

two phases of an inevitable global process centuries in the making with the potential for both positive and negative results This sophisticated presentation examines Why the developing world is growing more rapidly than the developed world How this development began occurring under the Western world s radar How former colonies of major powers grew to drive the world s economy Why so many Western economists have been slow to recognize the Great Convergence The increasing risk of geopolitical instability Why the world is likely to find itself without an absolute leader after the end of the American hegemony A work of rare scope Great Divergence and Great Convergence gives sociologists global economists demographers and global historians a deeper understanding of the broader movement of social and economic history combined with a long view of history as it is currently being made it also offers some thrilling forecasts for global development in the forthcoming decades
