Parmenides Alain Badiou,2025-05-20 Alain Badiou's 1985 seminar on Parmenides initiated his ongoing dialogue with the pre Socratic philosopher and set out some of the foundational ideas of his own major philosophical works including *Being and Event* The seminar provides both a new understanding of the importance of Parmenides in establishing the fundamental terms of philosophy and a vital account of the intimate relationship between philosophy and mathematics For Badiou Parmenides inaugurates the history of philosophy by linking being thinking and nonbeing in a Borromean knot a linkage in which the relationship between any two terms requires the mediation of a third Badiou traces the permutations of this connection among fundamental concepts as it was transmitted to later thinkers including Plato Aristotle Descartes Hegel and Heidegger He also argues that Parmenides's account of philosophy establishes a new kind of formal reasoning that like mathematics breaks with the Greek mythic and poetic traditions and their assumption that truth derives from sensory experience This seminar demonstrates Badiou's unparalleled ability to recast the fundamental questions of philosophy

Forest Policies and Social Change in England Sylvie Nail,2008-05-08 Forestry has been witness to some dramatic changes in recent years with several Western countries now moving away from the traditional model of regarding forests merely as sources of wood Rather these countries are increasingly recognizing their forests as multi purpose resources with roles which go far beyond simple economics In this innovative book Sylvie Nail uses England as a case study to explore the relationships between forests society and public perceptions raising important questions about forest policy and management both now and in the future Adopting a sociological approach to forest policy and management the book discusses the current validity of the two principles underlying forestry since the Middle Ages first that forestry should only exist when no better use of the land can be made and second that forestry itself should be profitable The author stresses how values and perceptions shape policies and conversely how policies can modify perceptions and also how policies can fail if they do not take perceptions into account She concludes that many of the issues facing English forestry in the 21st century from leisure health and amenity provision through education and rural as well as urban regeneration to biodiversity conservation go well beyond both national borders and the scope of forestry Indeed forestry in the 21st century seems to be less about planting and managing trees than about being a vector and a mirror of social change This novel synthesis provides a valuable resource for advanced students and researchers from all areas of natural resource studies including those interested in social history socio economics cultural geography and environmental psychology as well as those studying landscape ecology environmental history policy analysis and natural resource management

Be Still! Gordon C. Stewart,2017-01-06 *Be Still* Departure from Collective Madness echoes the call of the Navajo sage and the psalmist who invited their hearers to stop If we keep going this way we're going to get where

we're going and be still Be still and know Like pictures in a photo album taken from a unique lens these essays zoom in on singular moments of time where the world is making headlines drawing attention to the sin of exceptionalism in its national racial religious cultural and species manifestations Informed by Japanese Christian theologian Kosuke Koyama Elie Wiesel Wendell Berry and others the author invites the reader to slow down be still and depart from collective madness before the Navajo sage is right Told in the voice familiar to listeners of All Things Considered and Minnesota Public Radio these poetic essays sometimes feel as familiar as an old family photo album but the pictures themselves are taken from a thought provoking angle
