fair minded depiction of Archbishop Rowan Williams Rowan Williams is a complex and controversial figure Widely revered for his personal qualities he is also an intellectual giant who towers over almost all his predecessors as Archbishop of Canterbury Among other achievements he has trounced the atheist Richard Dawkins and published over twenty well regarded books including several volumes of poetry and a major study of Dostoevsky Yet he is also one of the most reviled church leaders in modern history Long before facing calls to step down after his lecture on sharia law in early 2008 he had been accused of heresy on account of his pro gay views He has disappointed many of his own supporters as well So how has high office changed Rowan Williams Has he been bullied and manipulated Or is he perhaps playing a long game obliged to rate church unity above the pursuit of his own vision at a time when the Anglican Communion has never looked more unstable Rupert Shortt already the author of an acclaimed introduction to the Archbishop's thought offers answers to these and other questions in this authoritative biography He explores how the events of the Archbishop's remarkable life have shaped his beliefs and practices today Of particular interest is the riveting account of Williams's experience near the World Trade Center towers on the morning of September 11 2001 Written with Williams's cooperation *Rowan's Rule* not only elucidates his ideas but gives a compelling portrait of a private and in some ways surprisingly vulnerable man **Research Progress in**

Cronin,2019-01-15 This title was first published in 2001 Nineteenth century employers played a crucial role in the training and education of young workers in England This multi disciplinary study traces the connection between problems of technical education development and the increasingly antagonistic relations with skilled workers culminating in the Great Strike and Lockout of 1897 Cronin demonstrates that employers dominated by economic short termism extended their hegemony beyond the boundaries of the factory gates Their reluctance to endorse and sponsor technical education radically influenced the perception of technical education held by government and local authorities
