Secrets Of The Earths Magnetic Field:

Earth's Magnetic Field Secrets Dennis Brooks,2015-03-04 The Old Theory Until now there was only one theory regarding the source of Earth s magnetic field which is the internal dynamo theory This theory was accepted because it offered the best explanation at the time Also much research has been done to support the theory According to the internal dynamo theory a dynamo near the center of the planet generates the current that produces the magnetic field This dynamo would be in the liquid outer core of the planet It would produce the magnetic axis and project it from the planet The axis would expand and spread the magnetic field around the planet This theory also suggests that the internal dynamo is sustaining itself by using fuel from Earth s core The internal dynamo theory has changed over the years At first scientists thought that a bar magnet was in the center of the planet and the compass needle pointed to the poles of that magnet This made perfect sense at the time because we can see that the same thing happens when we put a compass near a bar magnet The Bar Magnet In The Sun image demonstrates the idea of the bar magnet theory However this example shows the bar magnet imbedded within the sun because just like the planets the sun also has a magnetic field which is more complex than Earth s magnetic field Scientists have tried to use the internal dynamo theory to explain the magnetic fields of all the planets some moons and the sun However the old model does not work for the sun moon and other planets The bar magnet concept lasted a long time as the main theory regarding the source of Earth s magnetic field However while trying to apply it to other cases scientists found problems with the theory Over the years they discovered that a bar magnet could not hold magnetism above the temperature of 770 degrees centigrade because high heat destroys magnetism This caused the theory to gradually evolve over time

Researchers first thought a huge magnet ran through the planet Next they thought there was a dynamo in the inner core Then they thought a dynamo might exist in the outer core of the planet Recently scientists have been studying the dynamo that is found with every planet that has a magnetic field This research has shown that the outer dynamo system is the source of the magnetic field The magnetic field of each planet Earth Jupiter Saturn Uranus and Neptune is produced by the ring currents in the radiation belts Each planet is a component of the dynamo system that produces the magnetic field *Secret Worlds* Martin Stevens,2021

Beyond our hearing rats and mice sing to woo females Beyond our sight bees see the ultraviolet markings of flowers Beyond our conception sea turtles sense latitude and longitude through an internal magnetic map and sharks experience the electric fields created by prey So many animals sense their environment in rich strange and often exquisitely refined ways including ways beyond the limits of our own senses that scientists have only relatively recently identified In this book Martin Stevens describes these astonishing worlds of experience hidden from us what drove their evolution how scientists learn about them and the puzzles that remain Book jacket Secret of Electricity Amin Elersawi,2012-06-15

Dr Elersawi a pioneer in the filed of electricity and its effect in living things challenges the traditional mechanistic in our thinking about the living inner process of magnetism He found clues to the interaction between electromagnetic field and the human body Like the gravity of the earth and the quantum in the universe the magnet has different effect on different regions of the earth and the universe The strength and location of natural magnetic fields on the earth can influence our minds alter our character and noticeably affect our health The text explains the effect of magnetic fields on humans at different altitudes on the earth For example the intensity of magnetic fields at the two poles is greater than at the equator This reference explores the sources characteristics health hazards and benefits of electromagnetic fields EM of low frequency fields and of radio frequency radiations Pulsed Electro Magnetic Field Therapy PEMF is also expressed in pain relief osteoporosis treatment fibromyalgia treatment fracture healing rheumatic pain and stress reduction More over electricity and electromagnetic fields do affect the spiritual quality of the human Electricity can vibrate cells nerves bones organs and change the chemical reaction and metabolism Disharmonious or unbalanced vibrations show themselves in many ways including discomfort disease illness fatigue and a variety of different symptoms Higher vibrations mean healthy body and low vibrations mean an ailing body Interestingly particular electromagnetic waves can cause degenerative disorder of the central nervous system the brain which leads to Parkinson s and Huntington s diseases and impairments both in sequence learning and in the initiation and termination of voluntary movements The book contains materials describing different waves of EM of alpha beta and Gamma to explain their interaction with biological systems **Secrets of**
