Principles and Practices of Plant Quarantine M.C. Muthaiyan, 2009-04-06 Plant Quarantine deals with alien pests which could become serious threat to our agricultural horticultural and forest plants. Brief introduction of alien pests such as bacteria, fungi, insects, nematodes, plant viruses etc. is given in the preliminary chapters. Risk factors involved in these pests are analyzed. Various methods available to detect these pests from imported plants and plant material and their elimination procedures are discussed. The role of legislation containing the alien pests and efforts made by governments in implementing the legislative measures are described. The global approach to prevent the spread of pests across international borders and obligation of governments are brought out.
