Networked Data Acquisition Systems (Daq 96) - Proceedings Of The Second International Data Acquisition

Workshop Shuhei Ajimura, Masaharu Nomachi, 1997-07-15 This workshop followed the First International Conference which was hosted by Fermilab on 26-28 October 1994. That conference discussed the switch type event builder. Much intensive R & D work ensued from it showing the importance of 1) data flow control and 2) high speed memory access on network adapters/drivers. Those two themes are involved in many networked data acquisition systems. Therefore Networked Data Acquisition Systems was selected as the theme of DAQ 96. It includes a wide variety of data acquisition system presentations from present and near future experiments at high energy and nuclear physics laboratories. *Catalogue* Kansas State Agricultural College, Kansas State College of Agriculture and Applied Science, Kansas State University, 1918 *Office of Education*

Design, Media Selection, and Interface Design with a Focus on Computer-based Training / Educational Software

Peter Fenrich, 2014-03-21 This book is intended for students, instructional designers, professors, instructors, teachers, trainers, software developers, and development team leaders who are taking a course on creating computer based training educational software applications or will be working on a computer based training educational software development team. Need to expand their skills into the multimedia technology field, are excited about the possibilities of teaching with multimedia, have worked on their own and unsuccessfully tried to do it, all may have created mediocre computer based training educational software, want to do it right the first time, need a practical reference, need practical guidelines for creating computer managed presentations. This book focuses on the practical principles of creating computer based training educational software applications and computer managed presentations. In computer based training educational software applications, the computer assumes the teaching role. In computer managed presentations, you maintain the responsibility for teaching the learners and use what is contained in the presentation as a resource. In a sense, computer managed presentations are a subset of computer based training educational software applications. Their differences will be highlighted throughout this book. This book will not make you an expert in designing computer based training educational software applications. Expertise comes through years of experience and continual learning. However, this book will provide you with the foundations for creating professional instructionally effective products. To gain support for your computer based training educational software applications and computer managed presentations and to silence the critics, it is important to create excellent products. People will notice quality much more than quantity. This is especially true for your first project. This book, with its numerous practical hints, will help you do it right from your first project onward. *Office of Education Research Reports, 1956-65, ED 002 747-ED 003 960* Educational Research Information Center (U.S.), 1967 **Introduction to Chemical**
