The Highly Hypnotizable Person Michael Heap, Richard J. Brown, David A. Oakley, 2004-07-15 The **Highly Hypnotizable Person** is the first book to present an up to date comprehensive overview of what research and evidence there is for the existence and features of highly hypnotisable people *El-Hi Textbooks & Serials in Print, 2003* ,2003 *New Research on Early Childhood Education* Arthur T. Waddell, Rachel M. McBride, 2008 **Early Childhood Education** spans the human life from birth to age 8 Infants and toddlers experience life more

holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms those are often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience This book presents the latest research in this vital field

Developmental Sport and Exercise

Psychology Maureen R. Weiss, 2004 Research in mainstream psychology and sport psychology stresses the importance of a developmental perspective that considers continuity and change from infancy through older adulthood Understanding age related changes in perceptions physical competencies emotions social influences and achievement behaviours is critical in terms of developing theory enhancing the research knowledge base and devising applied programs to promote positive physical activity experiences for youth through older adults This book demystifies this perspective for students and researchers and contributes interesting and innovative ideas for the field The book examines the current sport and exercise psychology literature reviews mainstream theories from psychology and elaborates on how cognitive physical social and other developmental factors influence behaviours in physical activity settings Section One reviews fundamental concepts and controversies Section Two examines developmental issues in youth and adolescence such as parental influence competition and peer relationships Section Three discusses young middle and older adulthood in terms of self perceptions social influences motivational processes and self regulation skills Section Four covers expertise transitions moral development diversity disabilities and injury throughout the lifespan
