Measurements of Ice Hydrometeors Robert O. Berthel, 1990 Simulated measurements of assumed ice hydrometeor environments generate number size distributions similar to those from in situ measurements even to the point of reproducing several inconsistencies often found in actual data This report describes the computer fabrication of ice hydrometeors composed of single columns and combinations of columns with random spatial orientation and the simulated measuring of those particles by PMS 1 D instruments Varying effects on distribution shapes are demonstrated by using different assumptions of particle number and sizes Efforts were concentrated on exploring the problems of deficient number counts in the first or first few classes of precipitation probe data non compatible number concentrations from the cloud and precipitation probes and the apparent existence of a few large particles that are not consistent with the rest of the distribution This investigation indicates that the numbers sizes crystalline structures and spatial positioning of hydrometeors may be the cause of these effects **Measurement and Significance of Transport Number in Fused Salts** Richard W.

Laity, Frederick R. Duke, 1955 *Measuring Uncertainty within the Theory of Evidence* Simona Salicone, Marco Prioli, 2018-04-23 This monograph considers the evaluation and expression of measurement uncertainty within the mathematical framework of the Theory of Evidence With a new perspective on the metrology science the text paves the way for innovative applications in a wide range of areas Building on Simona Salicone's *Measurement Uncertainty An Approach via the Mathematical Theory of Evidence* the material covers further developments of the Random Fuzzy Variable RFV approach to uncertainty and provides a more robust mathematical and metrological background to the combination of measurement results that leads to a more effective RFV combination method While the first part of the book introduces measurement uncertainty the Theory of Evidence and fuzzy sets the following parts bring together these concepts and derive an effective methodology for the evaluation and expression of measurement uncertainty A supplementary downloadable program allows the readers to interact with the proposed approach by generating and combining RFVs through custom measurement functions With numerous examples of applications this book provides a comprehensive treatment of the RFV approach to uncertainty that is suitable for any graduate student or researcher with interests in the measurement field

Maglieri, 1960 **Nine Chapters on Mathematical Modernity** Andrea Br ard, 2019-06-25 The book addresses for the first time the dynamics associated with the modernization of mathematics in China from the nineteenth to the mid twentieth century from a transcultural global historical perspective Rather than depict the transformations of mathematical knowledge in terms of a process of westernization the book analyzes the complex interactions between different scientific communities and the ways in which the past modernity language and mathematics were negotiated in a global context In each chapter Andrea Br ard provides vivid portraits of a series of go betweens such as translators educators or state statisticians based on a vast array of translated primary sources hitherto unavailable to a non Chinese readership They not only illustrate how Chinese scholars mediated between new mathematical objects and discursive modes but also how they instrumentalized their autochthonous scientific roots in specific political and intellectual contexts While sometimes technical in style the book addresses all readers who are interested in the global and cultural history of science and the complexities involved in the making of universal mathematics While the pursuit of modernity is in the title entanglement is of as much interest Using the famous Nine Chapters as a framework Br ard considers a wide range of that entanglement from divination to data management Br ard's analysis and thought provoking insights show once again how much we can learn when two cultures intersect A fascinating read John Day Boston University [A new distance measure for trapezoidal fuzzy neutrosophic numbers based on the centroids](#) Broumi Said, Malayalan Lathamaheswari, Ruipu Tan, Deivanayagampillai Nagarajan, Talea Mohamed, Florentin
