The Ladies' Repository, and Gatherings of the West, 1843 *Hugh MacDiarmid, the Poetry of Self* John Baglow, 1987 Christopher Grieve writing under the name of Hugh MacDiarmid was a major modern poet and founder of the Scottish literary Renaissance In this study of his poetry John Baglow eliminates what has been a stumbling block for most MacDiarmid scholars by showing the very real thematic and psychological consistency which underlines MacDiarmid s work He demonstrates the extent to which the work was dominated by a desire to find a faith that could justify his desire to write poetry a desire continually thwarted by a critical intellect which destroyed whatever faith he was able to construct This constant search without a successful conclusion is at the heart of the work of many major modernist writers MacDiarmid s poetry can be seen as embracing this tradition and making it explicit

The Early Mathematical Manuscripts of Leibniz Gottfried Wilhelm Leibniz, 2008-12-01 The impact of the work of German mathematician GOTTFRIED WILHELM LEIBNIZ 1646 1716 on modern science and technology is all but incalculable but for starters his notation for infinitesimal calculus which he developed independently of Newton remains in use today and his invention of binary counting is the basis for modern computing He was a powerfully influential philosopher as well and is still considered alongside Descartes and Spinoza one of the great 17th century rationalists With no complete edition of his numerous writings on the wide range of subjects he expounded upon available even today this 1920 collection of his early mathematical manuscripts as well as some third party commentary on them continues to be essential to anyone wishing to

understand Leibniz's contributions to modern science. Here students of the history of science and math lovers alike will enjoy Leibniz's thoughts on the infinitesimal calculus including a series of manuscripts from 1675, 1676, and 1677 plus the essays *Leibniz in London* and *Leibniz and Pascal* by German scholar C.
