Productivity and Performance in the Paper Industry

Gary Bryan Magee, 1997-03-27 This pioneering 1997 study examines the economic development of the British paper industry between 1860 and 1914 an era in which it is often claimed that the origins of Britain's relative economic decline are first witnessed For paper making this was also a period in which an array of important new forces including inter alia the development of new raw materials and the move to ever larger scales of production came on the scene Gary Bryan Magee looks at the effect of these changes and assesses how effectively the industry coped with the new pressures drawing upon an extensive range of quantitative and archival sources from Britain America and other countries Along the way Dr Magee addresses issues central to the understanding of industrial competitiveness such as technological change entrepreneurship productivity trade policy and industrial relations

The Evolution of Global Paper Industry 1800–2050 Juha-Antti Lamberg, Jari Ojala, Mirva Peltoniemi, Timo Särkkä, 2012-12-22 This book presents an historical analysis of the global paper industry evolution from a comparative perspective At the centre are 16 producing countries Finland Sweden Norway the USA Germany Canada Japan the UK the Netherlands Italy Spain Portugal Chile Brazil Uruguay and Russia A comparative study of the paper industry evolution can achieve the following important research objectives First we can identify the country specific historical features of paper industry evolution and compare them to the general business trends explicable by existing theoretical knowledge Second we can identify and isolate the factors causing both the rise and fall of industrial populations Third a shared research agenda can produce an intensive analysis of global industry dynamics Finally an extended research period of 250 years can identify what is truly unique in the paper industry evolution and the extent to which it took the same path as other important manufacturing industries

The Large Industrial Enterprise

H.D. Watts, 2018-01-12 Large industrial enterprises are an important phenomena in advanced Western economies They control large percentages of total industrial assets employ millions of workers and together with their dependent satellite firms produce their own spatial patterns of employment location of production capacity and flow of material and information and thus dominate the economic base of whole towns This study first published in 1980 surveys a massive amount of work on large industrial firms and features an in depth study of the growth of large industrial enterprises in the UK brewing industry from 1951-76 This illustrates many of the themes discussed in the book

Paper and the British Empire Timo Särkkä, 2020-12-28 Paper and the British Empire

examines the evolution of the paper industry within British organisational frameworks and highlights the role of the Empire as a market and business making area in a world of shrinking commerce and rising trade barriers Drawing on a valuable range of primary sources this book covers the period 1861 1960 and examines events from the establishment of free trade backed by the gold standard to Britain's membership of the European Free Trade Association In the field of the paper industry the speed and intensity of the industrialisation process around the globe have been shaped by a wide variety of variables including the surrounding institutional framework entrepreneurial and organisational strategies the cost and accessibility of transport and the availability of capital knowledge energy resources and technology The supply of papermaking raw materials has also been key and has historically been the most important determinant for geographical location and dominance The research in this work focuses on the roles played by such variants on the one hand and demand characteristics on the other In particular it considers developments connected to a quest for Empire grown raw materials in order to tackle the problem of the lack of indigenous raw materials and the resulting dependence on Scandinavian wood pulp imports This text is of considerable interest to advanced students and researchers in economic history business history and the paper industry and will also be useful to organisations working within the pulp and paper industries

Uncertainty in the Electric Power Industry Christoph Weber,2006-01-06 Around the world liberalization and privatization in the electricity industry have lead to increased competition among utilities At the same time utilities are now exposed more than ever to risk and uncertainties which they cannot pass on to their customers through price increases as in a regulated environment Especially electricity generating companies have to face volatile wholesale prices fuel price uncertainty limited long term hedging possibilities and huge to a large extent sunk investments In this context *Uncertainty in the Electric Power Industry Methods and Models for Decision Support* aims at an integrative view on the decision problems that power companies have to tackle It systematically examines the uncertainties power companies are facing and develops models to describe them including an innovative approach combining fundamental and finance models for price modeling The optimization of generation and trading portfolios under uncertainty is discussed with particular focus on CHP and is linked to risk management Here the concept of integral earnings at risk is developed to provide a theoretically sound combination of value at risk and profit at risk approaches adapted to real market structures and

market liquidity Also methods for supporting long term investment decisions are presented technology assessment based on experience curves and operation simulation for fuel cells and a real options approach with endogenous electricity prices
