Braben, 2004-05-31 Ask questions not on the agenda Explore ideas wherever they lead Pursue goals because they re important Create options not yet perceived According to premier researcher Don Braben these are the vital intellectual processes that underlie all human achievement the kinds of risk taking activities that have made our civilization what it is today Yet warns Braben the same pioneer spirit that fueled our meteoric industrial and scientific growth is now being undermined by a growing climate of corporate caution and conformity In this groundbreaking manifesto on the importance of scientific freedom Braben asserts that the greatest long term risks facing humanity will not come from weapons of mass destruction prolonged global war devastating disease or famine or even from extinction by a huge wayward meteor Rather they will come from the debilitating attrition caused by the rising tides of bureaucracy and control that are steadily strangling human ingenuity and undermining our future Addressing this serious and growing problem *Pioneering Research A Risk Worth Taking* explains the urgent need to maintain both the originality and freedom of expression that is so vital to our

economic growth and scientific development Citing global trends and attitudes that currently threaten these conditions Braben details some bold new initiatives that may offer a possible solution A compelling read for today s scientists policy makers and concerned laypeople Braben s book will change our understanding of the politics of scientific achievement and expose the threat to our future from bureaucracy paper trails political correctness lowest common denominator solutions and accountability the invisible chains that bind the imagination and damage our society irreparably Biology and Its Makers William Albert Locy,1908 *The Grand Canyon* Randy Moore,Kara Felicia Witt,2018-06-15 This single volume encyclopedia examines the Grand Canyon in depth from the native peoples who have survived there for centuries to the explorers who charted its vast expanses and to the challenges that Grand Canyon National Park faces The Grand Canyon is one of the most internationally recognized landscapes and symbols of nature in North America In this one volume encyclopedia readers can dive into the many people places stories and issues associated with the Grand Canyon as well as the scientific religious and social contexts of events that have made the Grand Canyon what it is At the front of the encyclopedia are thematic essays that examine the Grand Canyon s history geography and culture Essays cover topics including John Wesley Powell to whom the Grand Canyon belongs the Native Americans who live at the Grand Canyon and the future of the Grand Canyon Following the thematic essays are approximately 150 topical entries focusing on more specific aspects of the Grand Canyon such as trails and camps natural formations and courageous heroes as well as shameless profiteers who have influenced the Grand Canyon s history The encyclopedia is rounded out by a chronology of human history at the Grand Canyon a Grand Canyon at a glance section and multiple fact based sidebars Through the people places and stories explored in this work readers will gain a better understanding of how the history of the Grand Canyon is relevant to the world today Victorian Popularizers of Science Bernard Lightman,2009-10-15 The ideas of Charles Darwin and his fellow Victorian scientists have had an abiding effect on the modern world But at the time *The Origin of Species* was published in 1859 the British public looked not to practicing scientists but to a growing group of professional writers and journalists to interpret the larger meaning of scientific theories in terms they could understand and in ways they could appreciate *Victorian Popularizers of Science* focuses on this important group of men and women who wrote about science for a general audience in the second half of the nineteenth century Bernard Lightman examines more than thirty of the most prolific influential and interesting popularizers of the day investigating the dramatic lecturing techniques vivid illustrations and accessible literary styles they used to communicate with their audience By focusing on a forgotten coterie of science writers their publishers and their public Lightman offers new insights into the role of women in scientific inquiry the market for scientific knowledge tensions between religion and science and the complexities of scientific authority in nineteenth century Britain Guided Evolution of Society Bela H. Banathy,2013-03-09 Based on a comprehensive review of human and societal evolution the book develops an approach to conscious self guided evolution In the course of the evolutionary journey of our species there have been three

seminal events The first happened some seven million years ago when our humanoid ancestors entered on the evolutionary scene Their journey toward the second crucial event lasted over six million years when as the greatest event of our evolutionary history homo sapiens sapiens started the revolutionary process of cultural evolution Today we have arrived at the threshold of the third major event the revolution of conscious evolution when it becomes our responsibility to enter into the evolutionary design space and guide the evolutionary journey of our species The book tells the story of the first six million years of the journey in just enough detail to understand how evolution had worked in times when it was primarily biological driven by natural selection With the human revolution some fifty thousand years ago with the emergence of self reflective consciousness the evolutionary process transformed from biological into cultural From this point on the book follows the journey with detailed attention in order to learn how cultural evolution works The book is organized in three parts Part One commences with an exposition of a brief history of the evolutionary idea through time with a focus on a review of the science of general evolution and specifically social and societal evolution Next the book unfolds the evolutionary story of our species from the time when the first humanoids entered the evolutionary scene to our current era Part Two develops a systems view of evolution explores the ways and means of how evolution works characterizes evolutionary consciousness and develops the idea of conscious evolution Part Three builds upon the knowledge developed in the first two parts and sets forth the key conditions of conscious self guided evolution elaborating the core condition which is the acquisition of evolutionary competence through evolutionary learning The focus of this part is on an approach to the design of evolutionary guidance systems that our families neighborhoods communities organizations social and societal systems can use to design the future they aspire to attain The work is set aside from other statements in three important ways It provides 1 a comprehensive review of how evolution has worked with a focus on socio cultural evolution 2 an explanation of evolutionary consciousness and the conditions of engaging in conscious evolution and 3 most significantly it develops a detailed approach and a methodology to the design of evolutionary guidance systems

Force of Nature Sajal Nag, 2017-08-07 The study of environmental history is no more only of forests rivers but also of agriculture climate economic practices and human culture In recent times environmental studies as a discipline has come to the forefront with growing concerns over the ozone layer depletion but has led to investigation of the historical factors and processes of man and environment relationship and its impact Very little was earlier known about the devastating impact on the environment of imperialism state capitalism of post colonial nations and the liberalization and globalization of these economies There is no aspect of the environment which has not felt the impact of such developmental human process Rivers have thus either dried up or are polluted with highly toxic materials seas and oceans have become the dumping ground of nuclear and other wastes streams are blocked rains reduced forest covers depleted wildlife has dwindled concrete jungles have replaced green fields and natural water bodies desertification of landscapes has happened It has had its own impact on human life as well Droughts floods dust storms

landslides water shortage agricultural decline and food crisis starvation and epidemics followed The planet earth and its inhabitants are currently in the throes of the most devastating man made crisis for survival In an attempt to enhance our understanding of the environmental crisis the present collection has essays investigating wide ranging events ranging from understanding climate from logbook of East India Company to the construction of Himalayan tropics environmental cost of damming the Damodar River to water politics of south India impact of Tsunami of the years 1737 as well as of 2004 5 politics over earthquake rehabilitation to the Sarna movements of eastern Indian tribals **How the Biosphere Works** Fred Spier, 2022-04-25 *How the Biosphere Works* Fresh Views Discovered While Growing Peppers offers a simple and novel theoretical approach to understanding the history of the biosphere including humanity's place within it It also helps to clarify what the possibilities and limitations are for future action This is a subject of wide interest because today we are facing a great many environmental issues many of which may appear unconnected Yet all these issues are part of our biosphere For making plans for the future and addressing our long term survival and well being an integrated knowledge of our biosphere and its history is therefore indispensable **Key Features** Documents what the biosphere is and what our position as humans within it is today Describes how the biosphere has become the way it is Summarizes the novel simple theoretical model proposed in the book and thus how the biosphere functions Predicts what the possibilities and limitations are for future human action Emphasizes how simple but careful observations can lead to far reaching theoretical implications

Embryology or ontology Ernst Haeckel, 1910 **The John Crerar Library** John Crerar Library, Aksel Gustav Salomon Josephson, 1911 [A List of Books on the History of Science](#) John Crerar Library (Chicago, Ill.), 1911 *Evolution and Consciousness, Revised Edition* Michael M.M.G.S. DelMonte, Maeve Halpin, 2023-02-27 This volume is a newly revised and updated edition of *Evolution and Consciousness* Brill 2019 and provides a comprehensive and accessible introduction to the emerging concept of the evolution of consciousness The simple but dynamic theory of evolving consciousness blends the powerful insights of modern science with the deep wisdom of age old cultures synthesising the traditions of East and West of the head and heart of male and female and of science and spirituality To borrow a phrase from American philosopher Ken Wilber it is a concept that transcends and includes all that has gone before By integrating diverse multi disciplinary approaches it provides an overarching and transcending model that moves us to a new level of meaning and understanding of our place in the world and in so doing deepens our work as psychotherapists **Proceedings, American Philosophical Society (vol. 82, 1940)**, *The Discoverers* Daniel J. Boorstin, 1985-02-12 An original history of man's greatest adventure his search to discover the world around him In the compendious history Boorstin not only traces man's insatiable need to know but also the obstacles to discovery and the illusion that knowledge can also put in our way Covering time the earth and the seas nature and society he gathers and analyzes stories of the man's profound quest to understand his world and the cosmos **The Science of Astrobiology** Julian Chela-Flores, 2011-07-28 Since the publication of *The New Science* of

Astrobiology in the year 2001 the first edition of the present book two significant events have taken place raising the subject from the beginning of the present century to its present maturity Firstly in 2001 the Galileo Mission still had two years to complete its task which turned out to be an outstanding survey of the Jovian system especially of its intriguing satellite Europa Secondly the Cassini Huygens Mission was still on its way to Saturn Its present success has surpassed all expectations of ESA and NASA Astrobiologists still did not know that Titan was the fifth body in the Solar System that possibly contained a water ocean including the Earth and the three Galilean satellites other than Io For these reasons the book includes overviews of the evolutionary and molecular biology that are necessary There is a discussion of other sectors of culture that are the natural frontiers of astrobiology especially the humanities

A Pioneer of Connection James Mussell, Graeme Gooday, 2020-05-26 Sir Oliver Lodge was a polymathic scientific figure who linked the Victorian Age with the Second World War a reassuring figure of continuity across his long life and career A physicist and spiritualist inventor and educator author and authority he was one of the most famous public figures of British science in the late nineteenth and early twentieth centuries A pioneer in the invention of wireless communication and later of radio broadcasting he was foundational for twentieth century media technology and a tireless communicator who wrote upon and debated many of the pressing interests of the day in the sciences and far beyond Yet since his death Lodge has been marginalized By uncovering the many aspects of his life and career and the changing dynamics of scientific authority in an era of specialization contributors to this volume reveal how figures like Lodge fell out of view as technical experts came to dominate the public understanding of science in the second half of the twentieth century They account for why he was so greatly cherished by many of his contemporaries examine the reasons for his eclipse and consider what Lodge a century on might teach us about taking a more integrated approach to key scientific controversies of the day
