Remapping East Asia:

A New East Asia Kazuko Mōri, Ken'ichirō Hirano, 2007 East Asia is normally identified as a group of countries lying along the western edge of the Pacific Ocean but in recent years scholars have begun thinking about a new East Asia that is a community rather than a set of sovereign states This regional community is a theoretical notion variously defined on the basis of economic or political relations philosophical orientations language or other criteria with each standard producing a different set of boundaries This book looks at the new East Asia from a Northeast Asian perspective considering it both as a theoretical construct and a practical reality The authors are Asian Studies specialists mainly from Japan but with contributions from Korea and the United States and they consider the trade and economic interaction diplomacy and security arrangements of East Asia Prepared as part of a five year research program conducted by Waseda University's 21st Century Center of Excellence for the Creation of Contemporary Asian Studies the essays are published here in English for the first time

The Political Economy of East Asia Ming Wan, 2020-09-03 Offering a coherent overview of the historical and institutional context of enduring patterns in East Asian political economy this updated and expanded second edition textbook explores the dramatic regional and international transformations that this key region has faced since the 2008 financial crisis

The Political Economy of Regionalism in East Asia H. Yoshimatsu, 2008-04-23 An exploration of the evolution of regionalism and regional economic relations in East Asia since the late 1990s The book analyzes moves towards free trade agreements cooperation in information technology energy and environment and agriculture by highlighting preferences and actions of governmental and business actors

East Asian Regionalism Christopher M. Dent, 2008-02-19 East Asia is a region that holds much fascination for many people It is one of the world's most dynamic and diverse regions and is also becoming an increasingly coherent region through the interplay of various integrative economic political and socio cultural processes Such a development is generally referred to as regionalism which itself has become a defining feature of the contemporary international system and this book explores the various ways in which East Asian regionalism continues to deepen Focusing on the main themes of the East Asia region and the study of regionalism economic regionalism and East Asia's new economic geography Southeast Asia and the Association of Southeast Asian Nations ASEAN trans regionalism East Asia's new free trade agreement trends and key transnational issues in East Asia such as international migration and energy security East Asian Regionalism will be an essential text for courses on East Asian regionalism Asian politics and Asian economics Key pedagogical features include end of chapter study questions case studies that discuss topical issues with study questions also provided useful tables and figures which illustrate key regional trends in East Asia extensive summary conclusions covering the chapter's main findings from different international political economy perspectives

The Future of East Asia Peter Hayes, Chung-In Moon, 2017-12-04 This book collects some of the most influential scholars in international relations who focus on Asia globally in exploring the challenges of diplomacy faced in Asia as US

policy drastically changes The president elect has suggested policies which if implemented would radically transform the way that the region functions what will this mean in practice China s government is also retrenching nationalist positions what is the future of China and what does that mean for the region A wide range of distinguished scholars concerned about the future have contributed their thoughts in an attempt to spark a global dialogue **Rethinking Security in East Asia** J. J. Suh, Peter J. Katzenstein, Allen Carlson, 2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security **Emerging Capitalism in Central Europe and Southeast Asia** F. Bafoil, 2015-12-24 This book examines the emergence of different forms of capitalism in Central Eastern states in Europe and Mekong states within the Association of Southeast Asian Nations ASEAN All of them but Thailand have historically disappeared from the regional maps for long periods of time due to colonial or imperial rule Most of them were previously members of a soviet type economy and they all joined ASEAN or the European Union in the 1990s or in the 2000s These states are characterized by a strong urge toward feelings of national sovereignty due to their experiences with colonialism and imperialism But due to the regional economic pressures and the globalization dynamic these states cannot articulate protectionist policies They are forced to open their economies in order to attract Foreign Direct Investments This results in less regulated and more political forms of capitalism than in some more developed capitalist countries This book analyzes forms of capitalism as the arising from a combination of three conditions the legacy of the foreign occupations the national construction process of the sovereign state and lastly the dynamics of regional integration These states claims to national sovereignty and the manner in which they developed suggests a causative link between the forms of political domination that have presided over these transformations and the forms of capitalism that have resulted **Japan's Relations with Southeast Asia** Peng Er Lam, 2013 The Fukuda Doctrine has been the official blueprint to Japan s foreign policy towards Southeast Asia since 1977 This book examines the Fukuda Doctrine in the context of Japan Southeast Asia relations and discusses the possibility of a non realist approach in the imagining and conduct of international relations in East Asia The collapse of 54 years of Liberal Democratic Party rule and the advent of a new Democratic Party of Japan raises the question of whether the Fukuda Doctrine is still relevant as a framework to analyse Tokyo s policy and behaviour towards Southeast Asia Looking at its origins and norms amidst three decades of change the book argues that the Fukuda Doctrine is still relevant to Japan Southeast Asian relations and should be extended to relations between China and Japan if an East Asian Community is to be built The book goes on to discuss the Fukuda Doctrine in relation to the power shift in Asia including the revitalization of Japan s security role By providing a detailed understanding of a non western perspective of Japan s relationship with Southeast Asia this book is a useful contribution for students and scholars of Asian Studies Politics and International Relations **China's Rise and Changing Order in East Asia** David Arase, 2017-01-05 This book discusses the impact of China s rise on regional order at three levels Sino US relations East Asia s contested sub regions and

regional institutions Sino US relations provide a framework to examine macro regional relations In East Asia s contested sub regions Northeast Asia Southeast Asia and the eastern Indian Ocean region the author explores the crucial role regional powers and local states play in maintaining effective governance and stability The author shows how regional institutions attempt to develop cooperation and shared norms that work toward regional community The inclusion of leading experts from China the US South Korea Japan Vietnam Singapore and India gives this collection a unique viewpoint and reveals how China s rise looks from inside and outside China as well as inside and outside the region **Remapping East Asia** T. J. Pempel, 2005 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In Remapping East Asia T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly **Asia's New Regionalism** Ellen L. Frost, 2008

The Making of Southeast Asia Amitav Acharya, 2013-02-15 Developing a framework to study what makes a region Amitav Acharya investigates the origins and evolution of Southeast Asian regionalism and international relations He views the Association of Southeast Asian Nations ASEAN from the bottom up as not only a U S inspired ally in the Cold War struggle against communism but also an organization that reflects indigenous traditions Although Acharya deploys the notion of imagined community to examine the changes especially since the Cold War in the significance of ASEAN dealings for a regional identity he insists that imagination is itself not a neutral but rather a culturally variable concept The regional imagination in Southeast Asia imagines a community of nations different from NAFTA or NATO the OAU or the European Union In this new edition of a book first published as *The Quest for Identity* in 2000 Acharya updates developments in the region through the first decade of the new century the aftermath of the financial crisis of 1997 security affairs after September 2001 the long term impact of the 2004 tsunami and the substantial changes wrought by the rise of China as a regional and global actor Acharya argues in this important book for the crucial importance of regionalism in a different part of the world Comparing Institution-Building in East Asia H. Yoshimatsu, 2014-05-29 Yoshimatsu explores the causes and implications of the diverse degree of institution building in East Asia by examining two processes of initiating and developing

multilateral institutions in five policy areas trade finance food security energy security and the environment **Southeast Asia between China and Japan** Lam Peng Er, Victor Teo, 2011-11-15 Triangular relations which frame China and Japan as two sides of an isosceles triangle usually focus on the United States as the significant third side This edited book examines another relatively underexplored set of triangular relations those between China Japan and Southeast Asia The region comprised of eleven small and medium size states is often considered inconsequential in the tempestuous world of international politics where political clout economic prowess military strength and soft power matter most Often seen as easily dominated by extra regional great powers this volume reconsiders the region's relationship with China and Japan their two Asian neighbours to the northeast which also happen to be the world's second and third largest economies While China and Japan do compete for turf in Southeast Asia states in the region do not perceive themselves as strategic pawns of these two great Asian powers but instead as proactively engaging China and Japan in the region The country specific case studies of this book collectively support the thesis that the Southeast Asian states actively seek to manoeuvre between China and Japan for their own advantage and at the same time grapple with developments in Northeast Asia through regional integration efforts Through the establishment of benchmark norms and values Southeast Asia attempts to socialise China and Japan and other external powers to the ASEAN way Indeed Southeast Asia as a region is now the driver of East Asian multilateralism and regionalism and the East Asian reality is that Southeast Asia is a major political economic and cultural player in its own right vis vis the great powers

Prospects for Monetary Cooperation and Integration in East Asia Ulrich Volz, 2010 East Asian countries were notably uninterested in regional monetary integration until the late 1990s when the Asian financial crisis revealed the fragility of the region's exchange rate arrangements and highlighted the need for a stronger regional financial architecture Since then the countries of East Asia have begun taking steps to explore monetary and financial cooperation establishing such initiatives as regular consultations among finance ministers and central bank governors and the pooling of foreign exchange reserves In this book Ulrich Volz investigates the prospects for monetary cooperation and integration in East Asia using state of the art theoretical and empirical tools to analyze the most promising policy options

The Haze Problem in Southeast Asia Helena Varkkey, 2015-07-16 Despite the efforts of Southeast Asian governments and of ASEAN transboundary haze continues to be a major environmental problem in Southeast Asia This book demonstrates that the issue is complex and explains why efforts to solve the problem in purely political terms are ineffective and likely to continue to be ineffective The book shows how state led state incentivised agribusiness development lies at the heart of the problem leading to a large rise in palm oil production with extensive clearing of forests leading to deliberate or accidental fires and the resulting haze Moreover although the forest clearing is occurring in Indonesia many of the companies involved are Malaysian and Singaporean and further many of these companies have close relationships with the politicians and officials responsible for addressing the problem and who thereby have a conflict of interest The author

concludes by discussing the huge difficulties involved in overturning this system of patronage politics **China Rising**

David C. Kang, 2010-01-22 Over the past three decades China has rapidly emerged as a major regional power yet East Asia has been more peaceful than at any time since the Opium Wars of 1839-1841. Why has the region accommodated China's rise? David C. Kang believes certain preferences and beliefs are responsible for maintaining stability in East Asia. His research shows that East Asian states have grown closer to China with little evidence that the region is rupturing. These states see China's rise as advantageous and are willing to defer judgment as to China's wishes and future actions. They believe that a strong China stabilizes East Asia while a weak China tempts other states to seek control of the region. Kang's provocative work reveals the flaws in contemporary views on China and offers a new understanding of sound U.S. policy in East Asia.

Asia and the Transformation of the World-System Ganesh K. Trichur, 2015-12-03 In this collaboratively authored book, world system scholars critically synthesize Asia's re-emerging centrality despite the myriad financial crises that have punctuated the end of the U.S. dominated Cold War world order. From different vantage points, the authors review the turbulent landscape of the region that points toward a new Asian world order as well as contradictory symptoms and signals. The text highlights the salience of Northeast Asia, the resurgence of Russia and Eurasianism, and the class, gender, and ecological implications of a conflict-ridden regional ascent for the future of the North-South divide and for the struggle between the spirit of Davos and the spirit of Porto Alegre.

Southeast Asia and the English School of International Relations L. Quayle, 2013-01-17 This book examines the interface between the theoretical framework known as the English School and the international and transnational politics of Southeast Asia. The region-theory dialogue it proposes signals productive ways forward for the theory.

International Relations in Southeast Asia N. Ganesan, Ramses Amer, 2010 The central theme of this book is the utility of bilateralism and multilateralism in Southeast Asian international relations. The intention was to examine a sufficient number of empirical cases in the Southeast Asian region since the mid-1970s so as to establish a pattern of interactions informing a wider audience of interactions unique to the region. Through these case studies, we seek to identify how this pattern of interaction compares with similar experiences elsewhere vis-à-vis the theoretical underpinnings of multilateralism and bilateralism. Consequently, this book also examines the theoretical drift in international relations literature at the broadest level and the overall drift of Southeast Asian international relations between the nations themselves and the Association of Southeast Asian Nations (ASEAN).
