Retrospective Miscue Analysis Yetta M. Goodman, Ann M. Marek, 1996-01-01 **Retrospective Miscue Analysis** Yetta M. Goodman, Ann Marek, 1989 **Making Sense of Learners Making Sense of Written Language** Kenneth S. Goodman, Yetta M. Goodman, 2014-04-11 Ken and Yetta Goodman's professional work has been a lifelong collaboration informed by shared philosophical strands. An overarching goal has been to provide access for all children to literacy and learning and to inform and improve teaching and learning. Each also is recognized for specific areas of focus and is known for particular concepts. This volume brings together a thoughtfully crafted selection of their key writings organized around five central themes: research and theory on the reading process and written language development; teaching curriculum and evaluation; the role of language advocacy and the political nature of schooling. In the World Library of Educationalists, international scholars themselves compile career-long collections of what they judge to be their finest pieces: extracts from books, key articles, salient research findings, major theoretical and practical contributions, so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field as well as the development of the field itself.

Reclaiming Reading Richard J. Meyer, Kathryn F. Whitmore, 2012-03-22 Inviting teachers back to the role of reflective advocates for thoughtful reading instruction, this book presents theory and pedagogical possibilities to reclaim and build upon the knowledge base that was growing when government mandates, scripted commercial programs, and high stakes tests took over as the dominant agenda for reading instruction in U.S. public schools. Focusing on literacy learners and their teachers' lives as literate souls, it examines how the teaching of reading can be reclaimed via an intensive reconsideration of five pillars as central to the teaching and learning of reading: learning, teaching, curriculum, language, and sociocultural contexts. *Reclaiming Reading* articulates the knowledge base that was marginalized or disrupted by legislated and policy intrusions into classrooms and provides practical examples for taking good reading instruction out of the cracks and moving it back to the center of the classroom. Explaining what happens in readers' minds as they read and how teachers can design practices to support that process, this book encourages teachers to initiate pedagogy that will help them begin or return to the stance of reflective, knowledgeable professional decision makers.

Building Classroom Reading Communities Rita A. Moore, Victoria N. Seeger, 2010 This title presents a successful approach for motivating students as individual readers while encouraging peer-to-peer learning. By showing how to use retrospective miscue analysis (RMA) and Socratic circles together, the authors help teachers create a sense of community in the classroom and promote achievement for every student.
