**Some New World** Peter Harrison, 2024-04-18 In his famous argument against miracles David Hume gets to the heart of the modern problem of supernatural belief We are apt says Hume to imagine ourselves transported into some new world where the whole form of nature is disjointed and every element performs its operation in a different manner from what it does at present This encapsulates observes Peter Harrison the disjuncture between contemporary Western culture and medieval societies In the Middle Ages people saw the hand of God at work everywhere Indeed many suppose that belief in the supernatural is likewise fundamental nowadays to religious commitment But dichotomising between naturalism and supernaturalism is actually a relatively recent phenomenon just as the notion of belief emerged historically late In this masterful contribution to intellectual history the author overturns crucial misconceptions myths about secular modernity challenging common misunderstandings of the past even as he reinvigorates religious thinking in the present

**Physics in Minerva's Academy** Steffen Ducheyne, 2025-01-27 This monograph explains how in the aftermath of the battle over Ren Descartes philosophy Newton s natural philosophy found fertile ground at the University of Leiden Newton s natural philosophical views and methods along with their underlying distinctions seamlessly aligned with the University of Leiden s institutional religious policy which urged professors and students to separate theology from philosophy Additionally these views supported the natural philosophical agendas of Herman Boerhaave Willem Jacob s Gravesande and Petrus van Musschenbroek Newton s natural philosophical program was especially useful in the three Leiden professors project of reforming existing disciplines and providing them with epistemic legitimacy

*The Legacies of Richard Popkin* Jeremy D. Popkin, 2008-11-05 Richard H Popkin 1923 2005 transformed the study of the history of philosophy in the second half of the twentieth century His History of Scepticism and his many other publications demonstrated the centrality of the problem of skepticism in the development of modern thought the intimate connections between philosophy and religion and the importance of contacts between Jewish and Christian thinkers In this volume scholars from around the world assess Popkin s contributions to the many fields in which he was interested The Legacies of Richard Popkin provides a broad overview of Popkin s work and demonstrates the connections between the many topics he wrote about A concluding article by Popkin s son Jeremy Popkin draws on private letters to provide a picture of Popkin s life and career in his own words revealing the richness of the documents now accessible to scholars in the Richard Popkin papers at the William Andrews Clark Library in Los Angeles

*Byron and the Discourses of History* Carla Pomarè, 2016-04-15 In her study of the

relationship between Byron's lifelong interest in historical matters and the development of history as a discipline. Carla Pomar focuses on drama: the Venetian plays *The Deformed Transformed* and *verse narrative The Siege of Corinth*; *Mazeppa* and dramatic monologue *The Prophecy of Dante*, calling attention to their interaction with historiographical and pseudo-historiographical texts ranging from monographs to dictionaries, collections of apophthegms, autobiographies and prophecies. This variety of discourses Pomar suggests not only served as a source of the historical information Byron cherished, providing the subject matter for countless episodes in his works, but also and primarily supplied him with epistemological models. From them Byron drew such trademark textual practices as his massive use of notes and paratexts, which satisfied his ingrained need for authenticity, a sentiment expressed in his oft-quoted "I hate things all fiction." As Pomar argues, Byron's meticulous tracing of the process that links events, documents and historical representations ultimately answers his desire to retrieve what might be lost during the transmission of historical knowledge. Thus does he betray his preoccupation with the ideological uses of history writing, projecting his own discourses of history into the present of their composition.

Skepticism in Classical Islam Paul L. Heck, 2013-11-20. The first major treatment of skepticism in Islam, this book explores the critical role of skeptical thinking in the development of theology in Islam. It examines the way key thinkers in classical Islam faced perplexing questions about the nature of God and his relation to the world, all the while walking a fine line between belief in God's message as revealed in the Qur'an and the power of the mind to discover truths on its own. *Skepticism in Classical Islam* reveals how doubt was actually an integral part of scholarly life at this time. Skepticism is by no means synonymous with atheism. It is rather the admission that one cannot convincingly demonstrate a truth claim with certainty, and Islam's scholars like their counterparts elsewhere acknowledged such impasses only to be inspired to find new ways to resolve the conundrums they faced. Whilst their conundrums were unique, their admission of the limits of knowledge shares much with other scholarly traditions. Seeking to put Islam on the map of the broader study of the history of scepticism, this book will be of interest to scholars and students of Religion, History and Philosophy. **Reading between the lines -**

**Leo Strauss and the history of early modern philosophy** Winfried Schröder, 2015-11-13. Since its publication in 1952, Leo Strauss's *Persecution and the Art of Writing* has stirred considerable controversy, particularly among historians concerned with early modern philosophy. On the one hand, several scholars share his view that it would be inadequate to generally take at face value the explicit message of texts which were composed in an era in which severe sanctions were imposed on those who entertained deviating views. Reading between the lines therefore seems to be the appropriate hermeneutical approach. On the other hand, the risks of such an interpretative maxim are more than obvious, as it might come up to an unlimited license to ascribe heterodox doctrines to early modern philosophers whose manifest teachings were in harmony with the orthodox positions of their time. The contributions to this volume both address these methodological issues and discuss paradigmatic cases of authors who might indeed be candidates for a Straussian reading between the lines: Hobbes, Spinoza.

and Bayle Academic Scepticism in the Development of Early Modern Philosophy Plínio Junqueira Smith, Sébastien Charles, 2016-12-27 This book explores how far some leading philosophers from Montaigne to Hume used Academic Scepticism to build their own brand of scepticism or took it as its main sceptical target The book offers a detailed view of the main modern key figures including Sanches Charron La Mothe Le Vayer Bacon Gassendi Descartes Malebranche Pascal Foucher Huet and Bayle In addition it provides a comprehensive assessment of the role of Academic Scepticism in Early Modern philosophy and a complete survey of the period As a whole the book offers a basis for a new balanced assessment of the role played by scepticism in both its forms Since Richard Popkin's works there has been considerable interest in the role played by Pyrrhonian Scepticism in Early Modern Philosophy Comparatively Academic Scepticism was much neglected by scholars despite some scattered important contributions Furthermore a general assessment of the presence of Academic Scepticism in Early Modern Philosophy is lacking This book fills the void **The Cambridge Companion to Hobbes's**

**Leviathan** Patricia Springborg, 2007-07-23 This Companion makes a new departure in Hobbes scholarship addressing a philosopher whose impact was as great on Continental European theories of state and legal systems as it was at home This volume is a systematic attempt to incorporate work from both the Anglophone and Continental traditions bringing together newly commissioned work by scholars from ten different countries in a topic by topic sequence of essays that follows the structure of Leviathan re-examining the relationship among Hobbes's physics metaphysics politics psychology and religion Collectively they showcase important revisionist scholarship that re-examines both the context for Leviathan and its reception demonstrating the degree to which Hobbes was indebted to the long tradition of European humanist thought This Cambridge Companion shows that Hobbes's legacy was never lost and that he belongs to a tradition of reflection on political theory and governance that is still alive both in Europe and in the diaspora **Enlightened Religion** Joke Spaans, Jetze

Touber, 2019-03-25 The history of the relation between religion and Enlightenment has been virtually rewritten In recent decades The idea of a fairly unidirectional rise of paganism or secularisation has been replaced by a much more variegated panorama of interlocking changes not least in the nature of both religion and rationalism This volume explores developments in various cultural fields from lexicology to geographical exploration and from philosophy and history to theology media and the arts involved in the transformation of worldviews in the decades around 1700 The main focus is on the Dutch Republic where discussion culture was more inclusive than in most other countries and where people from very different walks of life joined the conversation Contributors include Wiep van Bunge Frank Daudeij Martin Gierl Albert Gootjes Trudelien van't Hof Jonathan Israel Henri Krop Fred van Lieburg Jaap Nieuwstraten Joke Spaans Jetze Touber and Arthur Weststeijn
