

# SEPARATIST SHIPS

When most construction details millions of separatist warships in the Outer Rim, a few dozen battleships lead dozens of destroyers and frigates in a bold strike on the galactic capital Coruscant. These light warships, bristling with small laser cannons and impressive, overexposed cannons, were pledged to Grand Banks by the governments of hundreds of aggressively independent star sectors. As the craft are legally controlled by numerous distant lords and nobles, little crew space is required. This gives the ships a sinister, skeletal appearance. Destroyers and frigates are not equipped with long-range or ground attack armaments but carry enough security details for boarding actions. They can also act as "tows" for Separatist warfighters, providing protection inside their spacious hull corridors. If the vessels' defenses should fail, however, these hulls can make them valuable targets for Republic defenders.
