Belgrave, Kevin Wendell Allison, Camilla W. Nonterah, 2025-08-18 Expanding Definitions of Giftedness Guadalupe Valdes, 2014-04-04 This book is about bilingual young people who have been selected by their families to carry out the hard work of interpreting and translating to mediate communication between themselves and the outside world between minority and majority communities It examines the experiences of these young interpreters and the skills they develop in order to fulfill this role The authors purpose in this volume is to contribute to extending current definitions of gifted and talented by proposing and offering evidence that the young people who are selected to serve as family interpreters perform at remarkably high levels of accomplishment when compared with others of their age experience and environment and should thus clearly be included in the 1993 U S federal definition of giftedness They maintain that not only are these capabilities currently overlooked by existing assessment procedures but also that there is little understanding of the ways in which the unique talents of young interpreters might be nurtured and developed in academic settings A strong case is made that in order for such students to be identified as gifted on the basis of their bilingual abilities the field of gifted and talented education must embrace the concept that bilingualism is a strength The field must also make developing bilingualism a focus of programs designed to meet the needs of the increasingly multilingual student population in the United States The research this book reports part of a larger five year study of giftedness through linguistic and cultural lenses funded by OERI through the National Research Center on the Gifted and Talented was conducted by researchers whose background is very much outside the field of gifted education Rather their focus is on language working within the traditions of qualitative sociolinguistics Thus this book offers a unique approach to the exploration of giftedness It asks researchers and practitioners ordinarily accustomed to working with quantitative data to examine and make sense of detailed and rich analyses of students linguistic performance and argues that it is only by understanding the challenges of such bilingual interactions that the field of gifted and talented education can expand and reframe its vision of giftedness Retaining African Americans in Higher Education Lee Jones, 2023-07-21 Retention of African Americans on campus is a burning issue for the black community and a moral and financial one for predominantly white institutions of higher education This book offers fresh insights and new strategies developed by fifteen scholars concerned by the new climate in which affirmative action is being challenged and eliminated This is the first book devoted specifically to retention of African Americans in higher education and is unique in addressing the distinct but inter related concerns of all three affected constituencies students faculty and administrators Each is considered in a separate section The student section shifts attention from to paraphrase McNairy fixing the student to focussing on higher education s need to examine and where appropriate revise policies curriculum support services and campus climate Responding to the new agenda shaped by the opponents of affirmative action but rejecting the defensive x

percent solutions espoused by its proponents this book puts forward new solutions that will provoke debate Section II begins with a survey of the literature on African American administrators and presents a Delphi study of twelve administrators to provide an understanding of pathways and barriers to success The contributors then consider the importance of developing community support and creating alliances the role of mentoring and the setting of clear expectations between the individual and the institution Starting with the recognition that African Americans represent less than five percent of full time faculty the chapters in the final section examine the effects of the dismantling of affirmative action the consequences of faculty salaries trailing more lucrative non academic employment the declining enrollment of students of color the politics of promotion and tenure and issues of identity and culture The book concludes by stressing the roles that parents faculty and administrators must play to empower African American students to take responsibility for their own academic performance This is a compelling controversial and constructive contribution to an issue of national importance *Diversity in Gifted Education* Gillian Eriksson,Belle Wallace,2006-10-05 This timely book brings together experts from around the world to share expertise and best practice to form an eclectic collection of the best approaches for teaching gifted and talented children from different cultures Each chapter presents an overview of international perspectives on the issues of multi cultural and gifted education examines the critical issues related to cultural definitions of giftedness in programming for diverse gifted students presents regional case studies in order to inform practitioners best practice examines issues of access for gifted students in relation to culture poverty race and gender In addition details of websites and associations which offer support and advice are also provided making this book an invaluable resource for academics researchers teachers and parents of gifted and talented children *Surmounting All Odds - Vol. 2* Carol Camp Yeakey,Ronald D. Fourteen expert contributors, including many from the original share with the editors a deep commitment to integrating REBT with other cognitive behavioral methods and to providing young people with developmentally appropriate care. Together they give readers a practical framework for conducting assessment, treatment and prevention with individuals, clients and groups as well as in family and school settings. Key features of this new edition include: Developmental considerations in using REBT with children and adolescents; Specific chapters devoted to major disorders: aggression, phobias, anxiety, depression, academic underachievement and ADHD; Latest strategies for challenging and changing the irrational beliefs of young people; Techniques for building key REBT skills: emotional resilience and frustration tolerance; Extensive research findings on the efficacy of REBT with young people; Brand new material on special issues involving parents, conducting group sessions and working with exceptional children; An overview of Rational Emotive Education and You Can Do It Education; school based applications of REBT.
