Reviving local democracy Rao, Nirmala, 2000-09-20 Reviving local democracy offers a vivid and persuasive critical examination of New Labour's programme for the modernisation of local government providing a balanced view of the democracy and participation debate. Since 1997 the Blair government has sought to mobilise popular participation through local referenda, new political structures, electoral reform and the creation of powerful new elected mayors. Through these mechanisms it is hoped that the lack of public interest and persistently low election turnouts will be overcome. The book draws on a wide range of new survey data to relate the crisis of local politics and governance to wider changes in the political culture. The author goes on to evaluate the government's proposals to reverse decline, asking whether this programme of reform is likely to succeed. With the aid of a series of recent surveys of both public and councillor opinion and the successful blending of historical and empirical analysis, she offers an assessment of the realities which the democratic renewal project will have to confront in its implementation. The book is topical and timely and highly accessible and will appeal to students, those involved in local government and anyone concerned to see local government become more representative, responsive and open to popular participation.

Public Administration in the Information Age I. Th. M. Snellen, Marcel Thaens, Wim B. H. J. van de Donk, 2012 The information age has become a reality and has brought with it many implications for public administration. New ICTs offer new opportunities for government and governing but at the same time they pose challenges in some key areas of public administration like trust or the idea of checks and balances. This book is an examination of the developments and effects of ICT in public administration over the last 10 to 15 years. It represents a re-visiting of the 1998 IOS Press publication *Public Administration in an Information Age: A Handbook*. As a point of departure, the authors of this new book have chosen the speed of the succession of theoretical approaches represented by the phase of theories which has appeared since 1998. This approach, which reflects that of the 1998 handbook, avoids the impression of technological determinism and provides an opportunity to focus on the phases of theory and technological developments. The book is divided into five sections. The first section examines key issues and the second focuses on aspects of democracy. In the third section, the focus shifts towards structural conditions, the conditions that public administration has to meet in order to maintain its effectiveness and its legitimacy in the information age. Section four addresses some objects of implementation like IT inspired redesign, HRM and

the phenomenon of Street Level Bureaucrats Finally the last section offers some concluding thoughts Publisher's website
