Revolution Or Reform A Confrontation:

Revolution or Reform? Thomas Molnar, Herbert Marcuse, 2023-04-14 This series provides a forum for the critical review of enduring issues concerning ethics and society The text of the debate between Herbert Marcuse and Sir Karl Popper which follows in this volume raises many important issues The crucial issues between the two participants are 1 their anthropological axiological positions with respect to the nature of man society and the practical functions of democracy as a mode of self government 2 the conceptions of science and of philosophy which lie behind each thinker s claims with respect to these and 3 their respective conceptions of the means required and feasible for attaining their respective social goals The remarks which follow will attempt to focus upon and deal critically with the problems implicit in these three areas

The Evolution and Significance of the Cuban Revolution Charles McKelvey, 2017-11-08 The book interprets the Cuban revolutionary movement from 1868 to 1959 as a continuous process that sought political independence and social and economic transformation of colonial and neocolonial structures Cuba is a symbol of hope for the Third World The Cuban Revolution took power from a national elite subordinate to foreign capital and placed it in the hands of the people and it subsequently developed alternative structures of popular democracy that have functioned to keep delegates of the people in power While Cuba has persisted the peoples of the Third World knocked down by the neoliberal project have found social movement and political life a renewal that is especially evident in Latin America and the Non Aligned Movement At the same time the capitalist world economy increasingly reveals its unsustainability and the global elite demonstrate its incapacity to respond to a multifaceted and sustained global crisis These dynamics establish conditions for popular democratic socialist revolutions in the North

John W. Burton: A Pioneer in Conflict Analysis and Resolution David J. Dunn, Hans Günter Brauch, Pamela Burton, 2024-04-26 This book charts John W Burton's transition from practitioner in diplomacy to pioneer in the theory of peace research thinking on world society and conflict resolution Born in 1915 given his father's name it was assumed that he would follow his father and become a Christian missionary He did not he joined the Australian Public Service From a junior position he rose rapidly He was forthright and some found him irritating or worse He progressed to the highest levels of policy making Amidst some controversy he resigned abruptly in 1951 He then worked on his farm outside Canberra writing avidly He did not intend to become an academic but in 1963 he was offered a position in International Relations at University College in London and he accepted He was key to the foundation of the International Peace Research Association IPRA in 1964 and of the Conflict Research Society in the UK because he thought that words and ideas were not enough there needed to be instruments of change Looking back he was in fact a secular missionary His aim Simple to change the world This book is an exploration of how conflict should be reinterpreted The ideas of his work are a product not of any metaphysical approach but of experience Burton knew the field Cold War diplomacy civil strife reforming organisations resistance to change He had been there and he found much to criticise This book illustrates what he had to offer and explains why These readings reveal shifts in his ideas cohering incrementally integrated into a new framework This

book presents his pioneering and relevant work Transcending disciplinary boundaries it will be of interest to students as well as professionals who address conflict at all levels of society from family to state The Mexican Revolution Jurgen Buchenau, Timothy Henderson, 2022-10-03 Henderson and Buchenau have done an excellent and thoughtful job of collecting a wide range of voices for students to learn about the Mexican Revolution and its causes both from above and from below I am particularly appreciative of the authors inclusion of women s voices and women s issues of the era including the point of view of the first woman elected to public office in Mexico They deserve praise for including documents that complicate widely accepted heroic revolutionary narratives of the period for students such as the experience of soldaderas and the massacre of Chinese people in Torreón It is also worth mentioning that the editors have done an admirable job in choosing documents from across Mexico s many diverse and heterogeneous regions The general Introduction is excellent it is both accurate and highly readable for students It is no easy feat to succinctly describe both the events and the significance of this period in Mexican history as the authors have done here Sarah Osten The University of Vermont China - U.S. relations in the 21st century fostering cooperation preventing conflict. , **Social Conflict and Educational Change in England and France 1789-1848** Michalina Vaughan, Margaret Scotford Archer, 2010-06-24 This book analyses the processes of educational change in England and France by relating political social economic and ideological trends to the changing pattern of educational institutions from the time of the Industrial and French revolutions The authors first assess the relevance of major sociological theories for the interpretation of the main trends in education in both countries in the first half of the nineteenth century They then put forward an alternative approach derived from Weber which links educational change with social conflict This theory of domination and assertion of groups competing for control over formal instruction before the emergence of the state system is applied to England and France in this period The main part of the book is devoted to a more detailed analysis of the competing groups in both countries and of their ideologies which served as blueprints for educational reform **Toward A Just World Order** Richard Falk, 2019-03-22 This text is designed to provide students with a solid theoretical and methodological base for understanding how the present international system works how that system is likely to evolve given current world trends and what realistically can be done to alleviate the most serious global problems Part 1 develops a world order perspective by examining Healthy Conflict in Contemporary American Society Jason A. Springs, 2018-04-12 Develops an approach to contemporary religious moral and political conflicts in which conflict may be constructively reframed and creatively engaged toward productive democratic practice rather than viewed mainly as a source of aversion that needs to be rooted out or resolved once and for all *Civil-Military Relations in Post-Conflict Societies* Orlando J. Pérez, 2015-04-10 Guatemala El Salvador Nicaragua and Honduras are four Spanish speaking countries in Central America that possess uniformed military institutions These four countries represent different approaches to reforms of civil military relations and embody varying degrees of success in both institutional democratization and the

managing of security forces In this book Orlando J P rez expertly examines the competing theories of civil military relations in Central America to advance our understanding of the origins consequences and persistence of militarism in Latin America Divided into four parts P rez begins by proposing a theoretical framework for analyzing civil military relations including an analysis of how U S foreign and military policy affects the establishment of stable civilian supremacy over the armed forces Part Two examines the institutional and legal structures under which civil military relations are carried out revealing in Part Three the reorientation of the missions and roles performed by the armed forces in each country The concluding part analyzes the role beliefs of members of the military and public opinion about the armed forces in relation to other institutions Combining both qualitative and quantitative data P rez bridges the gap between structural and cultural analyses for a more comprehensive understanding of the links between micro and macro level factors that influence civil military relations and democratic governance

Islamism and Revolution Across the Middle East Khalil al-Anani, 2021-08-12 Why did Islamists respond so differently to the Arab Spring What do these different responses tell us about Islamists ideological commitment and resilience or the contexts within which they were functioning This book is based on fieldwork on Islamists in eight Middle Eastern countries Egypt Tunisia Libya Morocco Yemen Jordan Kuwait and Syria The contributors trace the transformation of the Islamists ideology behaviour and strategy since the beginning of the Arab Spring The aim of the book is to show that Islamists necessarily have an interactive and dialectical relationship with the environments in which they find themselves and that their behaviour and political calculations are based on a wide range of local regional and global factors They take into account the impact of the different contexts the groups found themselves in from authoritarian to open and reformist and contexts of armed conflict and civil war An interdisciplinary project the book captures the ongoing transformation of Islamist parties to explain the reasons why some movements could adapt and make shifts in their discourse and strategy maintaining organizational coherence and unity while others fell short and suffered major splits and schisms The robust theoretical findings update existing literature on Islamism and advance the state of the field
