Revolutions as Organizational Change Baohui Zhan, 2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People s Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated

by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during Mao s long revolutionary war He brings to this task a broad and deep knowledge about revolutionary theory and also a razor like analytical sensibility which enables him to examine the pros and cons of existing perspectives Timothy P Wickham Crowley associate professor of sociology Georgetown University Scientific and Technical Aerospace Reports ,1995 **The Industrial Policy Revolution II** J. Messianism and Sociopolitical Revolution in Medieval Islam Said Amir Arjomand,2025-10-28 This study of messianism and revolution examines an extremely rich though unexplored historical record on the rise of Islam and its sociopolitical revolutions from Muhammad s constitutive revolution in Arabia to the Abbasid revolution in the East and the Fatimid and Almohad revolutions in North Africa and the Maghreb Bringing the revolutions together in a comprehensive framework Sa d Amir Arjomand uses sociological theory as well as the critical tools of modern historiography to argue that a volatile but recurring combination of apocalyptic motivation and revolutionary action was a driving force of historical change time and again In addition to tracing these threads throughout 500 years of history Arjomand also establishes how messianic beliefs were rooted in the earlier Judaic and Manichaeian notions of apocalyptic transformation of the world By bringing to light these linkages and factors not found in the dominant sources this text offers a sweeping account of the long arc of Islamic history NASA Scientific and Technical Reports United States. Portugal far exceeded those of other developed countries and their examination provides insights poses important questions and suggests unexpected answers relevant far beyond Portugal The Portuguese revolution provides a unique window through which to examine not only the role of community organizations in a time of revolutionary change but also the dynamics potential and limitations of majority participation Over a period of nineteen months beginning with a military coup which ended the longest lasting European dictatorship the period brought to a close 500 years of colonialism in Africa and ending with another military coup the Portuguese society and political debate were significantly transformed largely by the unanticipated development of mass movements advocating direct democracy and social economic and political change
