

# Rhetoric

Today this term means “the art of speaking or writing effectively (especially persuasive speaking or writing).” In Franklin’s time the term meant the same thing, but more precisely it stood for “the study of principles and rules of composition formulated by critics of ancient times.”

# Reason

If one is “rational,” then he has the ability “to reason.” What does it mean to reason? Reasoning is a type of thinking used to seek a truth through cause and effect and through drawing conclusions.

# Logic

A system of rules used to express reasoning

# Socratic Method

A technique in which a debater does not argue directly but instead asks a series of questions, with the result that the opponent comes either to the desired knowledge by answering the questions or to a deeper awareness of the limits of his knowledge.

**The Rhetoric of Reason** James Crosswhite, **Deep Rhetoric** James Crosswhite, 2013-04 Chapter by chapter Deep Rhetoric develops an understanding of rhetoric not only in its philosophical dimension but also as a means of guiding and conducting conflicts achieving justice and understanding the human condition **Contemporary Rhetorical Theory** John Louis Lucaites, Celeste Michelle Condit, Sally Caudill, 1999-01-01 This indispensable text brings together important essays on the themes issues and controversies that have shaped the development of rhetorical theory since the late 1960s An extensive introduction and epilogue by the editors thoughtfully examine the current state of the field and its future directions focusing in particular on how theorists are negotiating the tensions between modernist and postmodernist considerations Each of the volume s eight main sections comprises a brief explanatory introduction four to six essays selected for their enduring significance and suggestions for further reading Topics addressed include problems of defining rhetoric the relationship between rhetoric and epistemology the rhetorical situation reason and public morality the nature of the audience the role of discourse in social change rhetoric in the mass media and challenges to rhetorical theory from the margins An extensive subject index facilitates comparison of key concepts and principles across all of the essays featured **Omniscience and the Rhetoric of Reason** Sara L. McClintock, 2010-10-12 The great Buddhist writer Santaraksita 725 88 was central to the Buddhist traditions spread into Tibet He and his disciple Kamalasila were among the most influential thinkers in classical India They debated ideas not only within the Buddhist tradition but also with exegetes of other Indian religions and they both traveled and nurtured Buddhism in Tibet during its infancy there Their views however have been notoriously hard to classify The present volume examines Santaraksita s encyclopedic Tattvasamgraha and Kamalasila s detailed commentary on that text in his Panjika two works that have historically been presented together The works cover all conceivable problems in Buddhist thought and portray Buddhism as a supremely rational faith One hotly debated topic of their time was omniscience infinite all encompassing knowledge whether it was possible and whether one could defensibly claim it as a quality of the Buddha *Reason and Rhetoric in the Philosophy of Hobbes* Quentin Skinner, 1996-02-22 An outstanding new interpretation of Hobbes one of the most difficult and challenging of political philosophers **Logic and Contemporary Rhetoric** Nancy Cavender, Howard Kahane, 2012 *Bulletin* Catholic Educational Association, 1912 Nov issue includes Proceedings of the annual meeting **Voices of Modernity** Richard Bauman, Charles L. Briggs, 2003-07-03 Language and tradition have long been relegated to the sidelines as scholars have considered the role of politics science technology and economics in the making of the modern world This reading of over two centuries of philosophy political theory anthropology folklore and history argues that new ways of imagining language and representing supposedly premodern people the poor labourers country folk non europeans and women made political and scientific revolutions possible The connections between language ideologies privileged linguistic codes and political concepts and practices shape the diverse ways we perceive ourselves and

others This 2003 book demonstrates that contemporary efforts to make schemes of social inequality based on race gender class and nationality seem compelling and legitimate rely on deeply rooted ideas about language and tradition Showing how critics of modernity unwittingly reproduce these foundational fictions it suggests strategies for challenging the undemocratic influence of these voices of modernity The Essence of Islamist Extremism Irm Haleem, 2011-11-23 This book provides a critical and a conceptual analysis of radical Islamist rhetoric drawn from temporally and contextually varied Islamist extremist groups challenging the popular understanding of Islamist extremism as a product of a clash of civilizations Arguing that the essence of Islamist extremism can only be accurately understood by drawing a distinction between the radical Islamist explanations and justifications of violence the author posits that despite the radical Islamist contextualization of violence within Islamic religious tenets there is nothing conceptually or distinctly Islamic about Islamist extremism She engages in a critical analysis of the nature of reason in radical Islamist rhetoric asserting that the radical Islamist explanations of violence are conceptually reasoned in terms of existential Hegelian struggles for recognition as fundamentally struggles against oppression and the radical Islamist justifications of violence are conceptually reasoned in terms of moral consequentialism With a detailed analysis of Islamist extremist discourse spanning a wide range of contexts this book has a broad relevance for scholars and students working in the field of Islamic studies religious violence philosophy and political theory *Categories and Contexts* Simon Szreter, Hania Sholkamy, A. Dharmalingam, 2004-03-18 Throughout its history as a social science demography has been associated with an exclusively quantitative orientation for studying social problems As a result demographers tend to analyse population issues scientifically through sets of fixed social categories that are divorced from dynamic relationships and local contexts and processes This volume questions these fixed categories in two ways First it examines the historical and political circumstances in which such categories had their provenance and second it reassesses their uncritical applications over space and time in a diverse range of empirical case studies encouraging throughout a constructive interdisciplinary dialogue involving anthropologists demographers historians and sociologists This volume seeks to examine the political complexities that lie at the heart of population studies by focusing on category formation category use and category critique It shows that this takes the form of a dialectic between the needs for clarity of scientific and administrative analysis and the recalcitrant diversity of the social contexts and human processes that generate population change The critical reflections of each chapter are enriched by meticulous ethnographic fieldwork and historical research drawn from every continent This volume therefore exemplifies a new methodology for research in population studies one that does not simply accept and re use the established categories of population science but seeks critically and reflexively to explore test and re evaluate their meanings in diverse contexts It shows that for demography to realise its full potential it must urgently re examine and contextualize the social categories used today in population research

Rhetorical Argumentation in Biblical Texts Anders Eriksson, Thomas H. Olbricht, Walter Übelacker, 2002-06-01 In the

latest volume in the Emory Studies in Early Christianity series the contributors seek a better understanding of how various biblical authors present their arguments support their claims and attempt to persuade their readers A century ago the rhetorical analysis of texts focused on the study of rhetorical figures in texts *elocutio* In the mid twentieth century scholars such as James Muilenburg Hans Dieter Betz and Wilhelm Wuellner introduced biblical scholars to the illustrious tradition of rhetorical study These scholars tended to focus on the arrangement of the texts themselves *dispositio* During the last ten years however interpreters have increasingly studied the rhetorical argumentation in texts The authors in this volume examine rhetorical argumentation in the Hebrew Bible the Gospels the Pauline letters and the Book of Revelation offering striking new readings of these materials Contributors include J David Hester Amador Center for Rhetoric and Hermeneutics R Dean Anderson Valkenburg The Netherlands Harold W Attridge Yale Divinity School L Gregory Bloomquist St Paul University Ottawa Michael R Cosby Messiah College Rodney K Duke Appalachian State University Frans H van Eemeren University of Amsterdam Anders Eriksson Lund University Alan J Hauser Appalachian State University Roy R Jeal William and Catherine Booth College Manfred Kraus Eberhard Karls Universit t T bingen John W Marshall University of Toronto Roland Meynet Pontificia Universit Gregoriana Thomas H Olbricht Emeritus Pepperdine University Carol Poster Florida State University Rollin A Ramsaran Emmanuel School of Religion Vernon K Robbins Emory University and University of Stellenbosch Russell B Sisson Union College Jerry L Sumney Lexington Theological Seminary C Jan Swearingen Texas A Lauri Thur n Univeristy of Joensuu Johan S Vos Vrije Universiteit and Duane F Watson Malone College
