Samoan Medical Belief And Practice:

Samoan Medical Belief and Practice Cluny Macpherson, La'ava Macpherson, 1990 This is the first comprehensive study of Samoan music Cluny and La'ava Macpherson have carried out intensive investigation into the practice and beliefs of contemporary indigenous healers or fof in Western Samoa to produce a fascinating and thorough study They explain convincingly why traditional Samoan medicine and its skilled practitioners continue to flourish alongside Western medical practice both in Samoa and in Samoan immigrant communities Back cover *Faith and the Pursuit of Health* Jessica Hardin, 2018-10-26 Salvation and metabolism Ethnography between clinic and church Discerning ambiguous risks Freedom and health responsibility Embodied analytics Well being and deferred agency Support synergies Integrating faith into healthcare practice **Reconstructing Obesity** Megan B. McCullough, Jessica A. Hardin, 2013-10-01 In the crowded and busy arena of obesity and fat studies there is a lack of attention to the lived experiences of people how and why they eat what they do and how people in cross cultural settings understand risk health and bodies This volume addresses the lacuna by drawing on ethnographic methods and analytical emic explorations in order to consider the impact of cultural difference embodiment and local knowledge on understanding obesity It is through this reconstruction of how obesity and fatness are studied and understood that a new discussion will be introduced and a new set of analytical explorations about obesity research and the effectiveness of obesity interventions will be established *Introducing Medical Anthropology* Merrill Singer, Hans Baer, Debbi Long, Alex Pavlotski, 2019-03-20 The third edition of *Introducing Medical Anthropology A Discipline in Action* provides students with a first exposure to the growing field of medical and health anthropology The narrative is guided by unifying themes First health oriented anthropologists are very involved in the process of helping to varying degrees to change the world around them through their work in applied projects policy initiatives and advocacy Second the authors present the fundamental importance of culture and social relationships in health and illness by demonstrating that illness and disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology Third through an examination of the issue of health inequality this book underlines the need for an analysis that moves beyond cultural or even ecological models of health toward a comprehensive biosocial approach Such an approach integrates biological cultural and social factors in building unified theoretical understandings of the origin of ill health while contributing to the building of effective and equitable national health care systems NEW TO THIS EDITION All chapters have been updated or expanded NEW Chapter 8 The Biopolitics of Life Biotechnology Biocapital and Bioethics Revised text style for crisper language and livelier phrasing Added a brief signposting of chapter content at the beginning of each chapter and review questions about the key issues and concepts at the end of each chapter Expanded discussion of Zika Ebola gender and health PTSD and psychological anthropology geriatric health the contemporary vaccine controversy the internet and health and the health impacts of fracking and nuclear energy development Concluding chapter examines

anthropologically informed strategies and visions for a healthier world Whispers and Vanities Tamasailau M. Suaalii-Sauni, Mauaiaivao Albert Wendt, Naomi Fuamatu, Upolu Luma Va'ai, Reina Whaitiri, Stephen L. Filipo, 2014-11-14 This collection of essays and selected poetry responds to an address on Samoan religious culture given by Samoa's Head of State His Highness Tui Atua Tupua Tamasese Ta'isi Tupuola Tufuga Efi to the 2009 Parliament of the World's Religions The address challenges some fundamental aspects of and assumptions in modern Samoan indigenous religious culture The essays and poetry form a carefully woven critique from within and outside Samoa of aspects of Samoa's religious and cultural values

Encyclopedia of Medical Anthropology Carol R. Ember, Melvin Ember, 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world **Healing**

Practices in the South Pacific Claire D. Parsons, 1985-01-01 **Island Noni** Woodland Publishing, Neil Solomon, 1998-09-07 The fruit of the noni plant *Morinda citrifolia* has been used for hundreds of years by the people of Tahiti In this booklet renowned physician Neil Solomon discusses how this amazing fruit has emerged onto the Western medical scene demonstrating powerful therapeutic capabilities for disorders such as high blood pressure chronic pain and autoimmune dysfunction Biomedical Entanglements Franziska A. Herbst, 2016-10-01 Biomedical Entanglements is an ethnographic study of the Giri people of Papua New Guinea focusing on the indigenous population's interaction with modern medicine In her fieldwork Franziska A Herbst follows the Giri people as they circulate within and around ethnographic sites that include a rural health center and an urban hospital The study bridges medical anthropology and global health exploring how the biomedical is imbued with social meaning and how biomedicine affects Giri ways of life **Cultural Memory**

Jeannette Marie Mageo, 2001-02-01 How do foreign schemas and objects enter into indigenous ways of understanding the world How are the cultural self and the cultural other constructed in acts of remembering What is memory's role in the generation or degeneration of cultural meanings In contemporary Pacific societies these questions are not merely the subject of scholarly debate but speak to pressing life concerns This volume offers fruitful responses to such questions providing insights into colonial memory and its limitations and proposing explanations that illumine cultural memory processes These processes in turn elucidate ways of authoring cultural history and shed light on cultural identity which like other forms of identity is built from a remembered self Contributors explore valorizations of certain aspects of the remembered past

amnesias about other aspects Both are part of the rhetoric of colonizing cultures and of cultural identity and nationhood in many contemporary Pacific societies The provocative analyses and responses offered here are both academic and personal close engagement with individuals and their ways of life is evident These are at once intellectual journeys through the colonial landscapes of Pacific memory and attempts to understand the problems of politics and personhood cultural identity and meaning for real people in real places Cultural Memory confronts many of the most central anthropological issues of our time
