Transactions - The Jewish Historical Society of England Jewish Historical Society of England,1924 Vol 22 1968 69 includes its Miscellanies pt 7 1970 The Diary of Samuel Pepys Samuel Pepys,1971 **A Place for Everything** Judith

Flanders,2020-10-20 From a New York Times bestselling historian comes the story of how the alphabet ordered our world *A Place for Everything* is the first ever history of alphabetization from the Library of Alexandria to Wikipedia The story of alphabetical order has been shaped by some of history s most compelling characters such as industrious and enthusiastic early adopter Samuel Pepys and dedicated alphabet champion Denis Diderot But though even George Washington was a proponent many others stuck to older forms of classification Yale listed its students by their family s social status until 1886 And yet while the order of the alphabet now rules libraries phone books reference books even the order of entry for the teams at the Olympic Games it has remained curiously invisible With abundant inquisitiveness and wry humor historian Judith Flanders traces the triumph of alphabetical order and offers a compendium of Western knowledge from A to Z A Times UK Best Book of 2020 **Perceptions of Retailing in Early Modern England** Nancy Cox,Karin Dannehl,2017-05-15

Whilst there has been much recent scholarly work on retailing during the early modern period less is known about how people at the time perceived retailing both as onlookers artists and commentators and as participants Centred on the general theme of perceptions the authors address this gap in our knowledge by looking at a different aspect of consumption They focus on two ancillary themes the first is location and how contemporaries perceived the settlements in which there were shops the other is distance Pictures prints novels diaries and promotional literature of the tradespeople themselves provide much of the evidence Many of these sources are not new to historians but they have not been scrutinized and analysed with the questions in mind that are posed here The methodology to be employed has been developed by Nancy Cox over the last decade and is used successfully in her book *The Complete Tradesman* and in the compilation of the forthcoming *Dictionary of Traded Goods and Commodities 1550 1800* This book will find a ready market with scholars concerned with British social and economic history in the early modern period Although it is first and foremost a book written by historians for historians it nevertheless borrows concepts and approaches from various disciplines concerned with theories of consumption material culture and representational art *Metropolitan Science* Rebekah Higgitt,Jasmine Kilburn-Toppin,Noah

Moxham,2024-08-22 Exploring distinctive practices in the artisanal mercantile and governmental sites of London *Metropolitan Science* offers a new perspective on the development of a scientific culture between the years 1600 1800 Beginning with the demographics of London in the 17th and 18th centuries including its attraction of migrants importance as a centre of empire and the role of its institutions in government the authors analyse how and why London was a unique site of scientific activity Through the use of case studies such as the Tower of London s Royal Mint and the Livery Company Halls this book examines the city s sites of exchange for knowledge and practice and highlights the importance of both public and private spaces With exploration of London s military and colonial history the authors acknowledge how its port and maritime trade were not only central to growth and protection but also facilitated the organisation assessment valuation and pursuit of knowledge in the city Ultimately this book demonstrates that London corporations produced unique knowledge communities

that drew on networks across the city and beyond and uses a variety of spatial and material approaches to reveal the use representation and exchange of practice in these collective settings

Never Pure Steven Shapin, 2010-06 Steven Shapin argues that science for all its immense authority and power is and always has been a human endeavor subject to human capacities and limits Put simply science has never been pure To be human is to err and we understand science better when we recognize it as the laborious achievement of fallible imperfect and historically situated human beings Shapin's essays collected here include reflections on the historical relationships between science and common sense between science and modernity and between science and the moral order They explore the relevance of physical and social settings in the making of scientific knowledge the methods appropriate to understanding science historically dietetics as a compelling site for historical inquiry the identity of those who have made scientific knowledge and the means by which science has acquired credibility and authority This wide ranging and intensely interdisciplinary collection by one of the most distinguished historians and sociologists of science represents some of the leading edges of change in the scholarly understanding of science over the past several decades

O Sing unto the Lord Andrew Gant, 2017-03-22 This history of English church music is one of the wittiest and most whimsically irreverent works of scholarship in recent memory The Christian Century For as long as people have worshipped together music has played a key role in church life Here Andrew Gant offers a fascinating history of English church music from the Latin chant of late antiquity to the great proliferation of styles seen in contemporary repertoires The ornate complexity of pre Reformation Catholic liturgies revealed the exclusive nature of this form of worship By contrast simple English psalms set to well known folk songs summed up the aims of the Reformation with its music for everyone The Enlightenment brought hymns the Methodists and Victorians a new delight in the beauty and emotion of worship Today church music mirrors our multifaceted worldview embracing the sounds of pop and jazz along with the more traditional music of choir and organ And reflecting its truly global reach the influence of English church music can be found in everything from masses sung in Korean to American Sacred Harp singing From medieval chorales to Amazing Grace West Gallery music to Christmas carols English church music has broken through the boundaries of time place and denomination to remain familiar and cherished everywhere *O Sing unto the Lord* is the biography of a tradition a book that celebrates the sheer pleasure of raising a joyful sound to the Lord The Guardian What fundamentally is the function of church music and why have clerical authorities often been suspicious of how much attention music receives Gant engages these questions in intelligent energetic prose Publishers Weekly Excellent this authoritative and engaging history brings so much light and warmth to the subject Sunday Times The beauty of relating Christian history this way is that it broadens the focus to include the listening laity not just the clergy or the church establishment Foreword Reviews
