Bible and Bedlam Louise J. Lawrence, 2018-08-23 Bible and Bedlam first critically questions the exclusion and stereotyping of certain biblical characters and scholars perceived as mad as such judgements illustrate the sanism prejudice against individuals who are diagnosed or perceived as mentally ill perpetuated within the discipline of Western biblical studies Second it seeks to highlight the widespread ideological gatekeeping protection and policing of madness in both western history and scholarship with regard to celebrated biblical figures including Jesus and Paul Third it initiates creative exchanges between biblical texts interpretations and contemporary voices from mad studies and sources autobiographies memoirs etc which are designed to critically disturb disrupt and displace commonly projected and often pejorative assumptions surrounding madness Voices of those subject to diagnostic labelling such as autism schizophrenia and or psychosis are among those juxtaposed here with selected biblical interpretations and texts

Potts, 2016-10-03 This book examines Hart s career as a teacher editor journalist lecturer and public philosopher It explores his commitment to academic freedom humanizing education and community organizing The book highlights Hart s advocacy for democratic growth in education and his success in challenging ideas and promoting open debate

Jewish Intellectuals and the University M. Morris, 2006-12-11 Marla Morris explores Jewish intellectuals in society and in the university using psychoanalytic theory Morris examines Otherness as experienced by Jewish intellectuals who grapple with anti-Semitism within the halls of academia She claims that academia breeds uncertainty and chaos

The Academic Caesar Steve

Fuller,2016-09-19 Aimed directly at those who aspire to be university leaders in these turbulent times and written as an academic counterpart to Machiavelli's *The Prince* *The Academic Caesar* explores four themes that are central to the contemporary university its Caesar leaders its economics its disciplines and whether academics have a future in the universities Drawing on a wealth of experience writing about the social epistemology of higher education Steve Fuller makes a witty robust and provocative contribution to the ongoing debate about where the university has come from and where it is going *The Academic Caesar* will prove a fascinating read for those seeking new insights into current crisis in higher education as well as researchers and academics interested in the sociology of leadership *Decolonizing Foreign Language Education* Donaldo Macedo,2019-01-10 *Decolonizing Foreign Language Education* interrogates current foreign language and second language education approaches that prioritize white western thought Edited by acclaimed critical theorist and linguist Donaldo Macedo this volume includes cutting edge work by a select group of critical language scholars working to rigorously challenge the marginalization of foreign language education and the displacement of indigenous and non standard language varieties through the reification of colonial languages Each chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL ESL EFL educators as literature or linguistic theory

Establishing Telemedicine in Developing Countries: From Inception to Implementation Rifat Latifi,2006-07-15

Telemedicine and telehealth development has brought hope to developing countries and their most remote areas yet leaves very significant questions and anxiety among those hoping to maintain status quo of current medical practices When it comes to telemedicine and its applications most countries are actually in the same boat Even in the most developed countries hospitals telemedicine is still not practiced Advanced technology such as computers diagnostic imaging robotics voice activated machines and remote controls have changed the hospital and operating room theaters around the western world Essentially geography and distance have become abstract nouns and are meaningless in modern times At the same time the world equilibrium has not followed the punctuation of an industrial world directed by the broad bandwidth Nonetheless the patient has become an educated and informed consumer who questions the decisions of the practitioner and demands explanations and evidence based medical approaches The physician's expertise is validated through the Internet and other forms and the patient insists on care that is up to current world standards This multiple author book represents a serious attempt to analyze the most important issues in the field of telemedicine and telehealth It presents concrete assistance to those who would like to explore the possibilities of establishing telemedicine and telehealth in their countries as well as those individuals who would like to establish these programs in developing areas or in countries that simply do not have existing telemedicine networks *Postcapitalism* Raphael Sassower,2015-11-17 Debates over the role of government have intensified in the wake of America's deepest financial crisis since the Depression This book suggests new ways of moving

forward based on the policies and principles that have worked in the past Sassower shows how American pragmatism has guided the more successful financial policies undertaken during the past century This means that from the workplace to foreign aid Americans benefit when they collaborate with each other rather than only pursue their self interest in competitive ways Drawing on thinkers from Adam Smith to Keynes to Bernanke Sassower shows how a new era of postideological capitalism can emerge in the wake of the current economic crisis renewing America s leadership for the future [Back to the University's Future](#) Steve Fuller,2023-07-08 This volume addresses the central question facing the future of higher education around the world whether and why universities need to exist at all This book accepts the question s premise It is not clear that the university is any longer needed as an institution that is unless its defenders recover what had made the university the revolutionary institution that over the past two centuries has not only defined the shape of modern systematic inquiry but also the distinctiveness of the societies that have housed them In short what is required is a reanimation of the spirit of Wilhelm von Humboldt for our times hence the book s title and subtitle Humboldt was responsible for relaunching the university as the vanguard institution of Enlightenment to which we continue to pay lip service and sometimes not much more than that Admittedly the task of relaunching Humboldt today is made difficult because many of the concrete achievements associated with the Humboldtian university not least academic disciplines and nation states are increasingly seen as problematic if not obsolete However the global reach of the Humboldtian vision in its 19th century and 20th century heyday offers hope that it may be recovered in the 21st century The book focuses on the performative character of the academic vocation what Humboldt memorably characterized as the unity of research and teaching in the same person a role model for students and society at large The book s seven chapters develop this theme in a historically and philosophically nuanced way in terms of the Humboldtian vision of knowledge sense of free expression and critical judgement and commitment to translation and publicity
