and *Contact Theory of Perception* Chittaranjan Naik, 2019-09-27 If you were told that we perceive the world directly without the causal intervention of the physical brain or that we see the distant stars instantaneously without their light having to reach our sense organs would the idea sound incredible to you Farfetched as it may seem this idea the author argues comes from the time tested contact theory of perception Upheld by the Indian philosophical tradition for over 2000 years it unfolds a definitively coherent process of perception unlike the stimulus response theory of perception espoused by empirical science which suffers from a host of logical inconsistencies The contact theory of perception is a paradigm changing theory and it has the potential to take us to a domain of knowledge beyond science and to cause a radical transformation in the way we look at the universe we live in Although a serious philosophical work the language and lucid style of the presentation should appeal to a wide spectrum of people from academic philosophers to curious aspirants If philosophy or the philosophical traditions of India interests you you cannot afford to ignore this book But be forewarned it will challenge the deep rooted ideas that have become integral to your personal consciousness
