Adler,2019-09-05 We live in a time of crises economic turmoil workplace disempowerment unresponsive government environmental degradation social disintegration and international rivalry In *The 99 Percent Economy* Paul S Adler a leading expert on business management argues that these crises are destined to deepen unless we radically transform our economy But despair is not an option and Adler provides a compelling

alternative democratic socialism He argues that to overcome these crises we need to assert democratic control over the management of both individual enterprises and the entire national economy To show how that would work he draws on a surprising source of inspiration the strategic management processes of many of our largest corporations In these companies the strategy process promises to involve and empower workers and to ensure efficiency and innovation In practice this promise is rarely realized but in principle that process could be consolidated within enterprises and it could be scaled up to the national level Standing in the way Private ownership of society's productive resources which is the foundation of capitalism's ruthless competition and focus on private gain at the cost of society the environment and future generations Adler shows how socialized public ownership of our resources will enable democratic councils at the local and national levels to decide on our economic social and environmental goals and on how to reach them The growing concentration of industry makes this socialization step ever easier Democratic socialism is not a leap into the unknown Adler shows Capitalist industry has built the foundations for a world beyond capitalism and its crises

Lockwood, 2017-04-15 Exploring censorship imposed by corporate wealth and power this book focuses on the energy industry in Wyoming where coal oil and gas are pillars of the economy The author examines how governmental bodies and public institutions have suppressed the expression of ideas that conflict with the financial interests of those who profit from fossil fuels He reveals the ways in which university administrations art museums education boards and research institutes have been coerced into destroying artwork abandoning studies modifying curricula and firing employees His book is an eloquent story of the conflict between private wealth and free speech Providing more of the nation's energy than any other state Wyoming is a sociopolitical lens that magnifies the conflicts in the American West But the issues are relevant to any community that is dependent on a dominant industry and wherever the liberties of citizens and the ethics of public officials are at risk
