Science Technology And Everyday Life 1870 195:

Science, Technology, and Everyday Life, 1870-1950 Colin Chant, Richard Bessel, 1989 Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India It presents a new perspective on the principles and practices of early Indian architecture Defining it broadly over a range of space uses the book argues for architecture as a form of cultural production as well as public consumption Ten essays by leading archaeologists architects historians and philosophers examining different architectural sites and landscapes including Sanchi Moodabidri Srinagar Chidambaram Patan Konark Basgo and Puri demonstrate the need to look beyond the built form to its spirit beyond aesthetics to cognition and thereby to integrating architecture with its myriad living contexts The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building both sacred and secular which were however unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembeddedness that informs modern praxis This volume will be of interest to scholars and practitioners of architecture ancient Indian history philosophy art history and cultural studies

Who's who in Theology and Science ,1996 *Transforming the Countryside* Paul Brassley, Jeremy Burchardt, Karen Sayer, 2016-11-25 It is now almost impossible to conceive of life in western Europe either in the towns or the countryside without a reliable mains electricity supply By 1938 two thirds of rural dwellings had been connected to a centrally generated supply but the majority of farms in Britain were not linked to the mains until sometime between 1950 and 1970 Given the significance of electricity for modern life the difficulties of supplying it to isolated communities and the parallels with current discussions over the provision of high speed broadband connections it is surprising that until now there has been little academic discussion of this vast and protracted undertaking This book fills that gap It is divided into three parts The first on the progress of electrification explores the timing and extent of electrification in rural England Wales and Scotland the second examines the effects of electrification on rural life and the rural landscape and the third makes comparisons over space and time looking at electrification in Canada and Sweden and comparing electrification with the current problems of rural broadband

Regulating the Press Tom O'Malley, Clive Soley, 2000-11-20 A free press is the cornerstone of democracy Does this then give the press the right to print inaccurate material with relative impunity Should the public have a statutory right of reply to inaccuracy in the press And how free is the press in a world of converging technologies and crossmedia ownership Clive Soley and Tom O Malley set the issues of press regulation in their historical context focusing on the period after 1945 They specifically look at the history and record of the Press Council and assess the performance of the Press Complaints Commission The book analyses the arguments surrounding attempts to improve standards by introducing statutory rights for the public and the reasons for the failure of these initiatives Focusing on issues of principle such as accuracy misrepresentation and privacy the authors re examine the ways in which debates over

press freedom versus regulation illuminate the fundamental conflicts between a fully accountable press and the economic imperatives of the free market economy

Elusive Phenomena, Unwieldy Things Jutta Schickore, William R. Newman, 2024-02-26 This open access book provides a historical treatment of scientific control in experimentation in the longue dure The introduction distinguishes four related strands in the history of experimental control the development of practices to stabilize experimental conditions the career of the comparative design the unfolding of methodological discussions about control practices and designs and the history of the term control Each chapter brings these distinctions to bear on specific historical episodes The focus is on experiments with complex elusive phenomena such as perception and learning irregular movements and unobservable elements Such experiments bring control issues to the fore because they are difficult to design and stabilize and often controversial Together the chapters show that the local context shapes what exactly is controlled how control can be accomplished and how controls are justified They also show that control strategies and methodological ideas often remain stable for a long time and change only gradually This book as well as the volume on analysis and synthesis in experimentation by the same editors contains contributions by an array of experts from multiple disciplines making it suitable for historians and philosophers of science and students alike

C. B.,2021-12-17 The phenomenon of poverty despite being aggravated by the COVID 19 pandemic is recurrent and very harmful in peripheral countries There seems to be no single solution as each country faces its specificities requiring an immersion into its causes and consequences Multidimensional Approach to Local Development and Poverty Causes Consequences and Challenges Post COVID 19 discusses the results of research conducted on the multivariate causes of hunger and poverty and how the pandemic has aggravated this problem as well as the local development initiatives that have been implemented to mitigate the problem Covering a range of topics such as sustainable development and public policy this book is ideal for policymakers government officials practitioners researchers academicians instructors and students Arts & Humanities Citation Index ,2002 Linguistic Theory Robert De Beaugrande,2014-02-24 In Linguistic Theory Robert de Beaugrande analyses linguistic theories not as abstract ideas or theses but as the process and product of theoretical discourse He argues that the best documentation of this discourse can be found in the fundamental works of major linguists from Ferdinand de Saussure to Teun van Dijk and Walter Kintsch He therefore employs the highly unusual strategy of a close reading of these works as discourse performances and strives to uncover their main points and characteristic moves in the linguist s own words Through this approach the reader is able to appreciate and understand the variety and controversy among linguistic theories as they have emerged and developed in interaction with each other Special scrutiny is allocated to the issue of how far the active practice of the linguists followed their own theories and proposals and why The author concludes by assessing the prospects for linguistics to be drawn from the retrospect in the previous chapters How The West Grew Rich Nathan Rosenberg,L. E., Jr. Birdzell,2008-08-01 How did the West Europe Canada and the United States escape from immemorial poverty into sustained economic growth and material well being when other societies remained trapped in an endless cycle of birth hunger hardship and death In this elegant synthesis of economic history two scholars argue that it is the political pluralism and the flexibility of the West s institutions not corporate organization and mass production technology that explain its unparalleled wealth *Food in the United States, 1890-1945* Megan J. Elias,2009-06-08 No American history or food collection is complete without this lively insight into the radical changes in daily life from the Gilded Age to World War II as reflected in foodways From the Gilded Age to the end of World War II what where when and how Americans ate all changed radically Migration to urban areas took people away from their personal connection to food sources Immigration primarily from Europe and political influence of the Caribbean Latin America and the Pacific brought us new ingredients cuisines and foodways Technological breakthroughs engendered the widespread availability of refrigeration as well as faster cooking times The invention of the automobile augured the introduction of road food and the growth of commercial transportation meant that a wider assortment of foods was available year round Major

food crises occurred during the Depression and two world wars Food in the United States 1890 1945 documents these changes taking students and general readers through the period to explain what our foodways say about our society This intriguing narrative is enlivened with numerous period anecdotes that bring America history alive through food history
