Scraps Of The Untainted Sky Thomas Moylan, 2018-03-05 Dystopian narrative is a product of the social ferment of the twentieth century A hundred years of war famine disease state terror genocide ecocide and the depletion of humanity through the buying and selling of everyday life provided fertile ground for this fictive underside of the utopian imagination From the classical works by E M Forster Yevgeny Zamyatin Aldous Huxley George Orwell and Margaret Atwood through the new maps of hell in postwar science fiction and most recently in the dystopian turn of the 1980s and 1990s this narrative machine has produced challenging cognitive maps of the given historical situation by way of imaginary societies which are even worse than those that lie outside their authors and readers doors In Scraps of the Untainted Sky Tom Moylan offers a thorough investigation of the history and aesthetics of dystopia To situate his study Moylan sets out the methodological paradigm that developed within the interdisciplinary fields of science fiction studies and utopian studies as they grow out of the oppositional political culture of the 1960 and 1970s the context that produced the project of cultural studies itself He then presents a thorough account of the textual structure and formal operations of the dystopian text From there he focuses on the new science fictional dystopias that emerged in the context of the economic political and cultural convulsions of the 1980s and 1990s and he examines in detail three of these new critical dystopias Kim Stanley Robinson s The Gold Coast Octavia Butler s The Parable of the Sower and Marge Piercy s He She and It With its detailed documented and yet accessible presentation Scraps of the Untainted Sky will be of interest to established scholars as well as students and general readers who are seeking an in depth introduction to this important area of cultural production **Science Fiction and the Dismal**

Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-11-27 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction

and economics will assist other readers and critics who are interested in this subject **The Year's Best Science Fiction**
