Semilexical Categories The Function Of Content Words And The Content Of Function Words:

Semi-lexical Categories Norbert Corver, Henk van Riemsdijk, 2013-05-22 The distinction between functional categories and lexical categories is at the heart of present day grammatical theory in theories on language acquisition code switching and aphasia At the same time it has become clear however that there are many lexical items for which it is less easy to decide whether they side with the lexical categories or the functional ones This book deals with the grammatical behavior of such in between categories which are referred to here as semi lexical categories

Support-verb constructions in the corpora of Greek Victoria B. Fendel, 2024-11-07 This volume brings together corpora that span more than 3 000 years of the history of the Greek language from Itz s chapter on the proto language to Giouli s chapter on the modern language The authors take wider or narrower approaches with regard to the form and function of the type of construction that they include in the group of support verb constructions while all would agree that English to take initiative is a support verb construction opinions differ on English to take wing The chapters reflect a fascinating diversity of approaches to support verb constructions including Natural Language Processing Comparative Philology New Testament Exegesis Coptology and General Linguistics The volume is structured along the three interfaces that support verb constructions sit on the syntax lexicon the syntax semantics and the syntax pragmatics interfaces We finish with four concrete avenues for further research Faced with the diversity of approaches and the magnitude of disagreements arising from them when working with as internally diverse a group of constructions as support verb constructions we strive for in varietate unitas

Italian Dialectology at the Interfaces Silvio Cruschina, Adam Ledgeway, Eva-Maria Remberger, 2019-02-15 Recent years have seen a growing interest in linguistic phenomena whose formal manifestation and underlying licensing conditions represent the convergence of two or more areas of the grammar an area of investigation particularly invigorated in recent generative research by developments such as phase theory of Chomsky 2001 2008 and the cartographic enterprise of Rizzi 1997 Cinque 1999 In this respect the dialects of Italy are no exception in that they present comparative Romance linguists and theoretical linguists alike with many valuable opportunities to study the linguistic interfaces as highlighted by the many case studies presented in this volume which provide a series of original insights into how different components of the linguistic system syntactic phonetic phonological morphological semantic and pragmatic do not necessarily operate in isolation but rather interact to license phenomena whose nature and distribution can only be fully understood in terms of the formal mapping between the interfaces

'COME' and 'GO' off the Beaten Grammaticalization Path Maud Devos, Jenneke van der Wal, 2014-05-08 This edition brings together some lesser known grammaticalization paths travelled by come and go in familiar and less familiar languages No single book volume has been dedicated to the topic of grammatical targets different from tense and aspect so far This study will increase our insight in grammaticalization processes in general as they force us to rethink certain aspects of grammaticalization

Giving Gifts and doing Favours Victoria Beatrix Fendel, 2025-06-12 Support verb

constructions like to make a suggestion or to take heart are verbal multi word expressions They are lexically morphosyntactically semantically and pragmatically versatile and thus form an integral enriching and natural part of the classical Greek lexicon grammar Taking heart does not involve barbarism and taking a picture does not involve theft yet how does one know that for a corpus language like classical literary Attic Greek This book embraces the diversity of this internally heterogenous group of constructions which sit at three interfaces EXPLORING LINGUISTIC LANDSCAPES. A Festschrift for Larisa Avram and Andrei Avram Anca SEVCENCO,Irina STOICA,Ioana STOICESCU,Mihaela TĂNASE-DOGARU,Alina TIGĂU,Veronica TOMESCU,2025-01-01 The present volume honors the successful and productive scientific activity of Larisa Avram and Andrei Avram Colleagues and collaborators from universities in Romania and around the world contributed with papers that span various domains of research theoretical and experimental syntax and phonology semantics and pragmatics Selected Lexical and Grammatical Issues in the Meaning-text Theory Leo Wanner,Igor? Aleksandrovi? Mel?uk,2007-01-01 The Meaning Text Theory MTT is a lexicon centred and dependency based theory for the description of language using a holistic model that incorporates semantics syntax morphology and lexis This volume prepared on the occasion of Igor Mel?uk's 70th birthday offers a cross section of the current advances in MTT and its applications The first part of the book focuses on lexical phenomena that are still largely neglected in mainstream linguistics sound symbolism as manifested by ideophones and idiosyncratic lexical relations as manifested by lexical functions LFs In particular LFs are addressed from different angles including the introduction of new standard LFs the argument structure and semantic decomposition of lexical relations captured by LFs automatic recognition of LF instances in corpora and the use of LFs in terminology and natural language processing The second part of the book deals with such prominent model oriented issues as semantic paraphrasing in MTT the role of phrase structure in MTT and syntactic analysis within MTT *Formal approaches to number in Slavic and beyond* Mojmir Dočekal,Marcin Wągiel,2021 The goal of this collective monograph is to explore the relationship between the cognitive notion of number and various grammatical devices expressing this concept in natural language with a special focus on Slavic The book aims at investigating different morphosyntactic and semantic categories including plurality and number marking individuation and countability cumulativity distributivity and collectivity numerals numeral modifiers and classifiers as well as other quantifiers It gathers 19 contributions tackling the main themes from different theoretical and methodological perspectives in order to contribute to our understanding of cross linguistic patterns both in Slavic and non Slavic languages *Classifier Structures in Mandarin Chinese* Niina Ning Zhang,2013-05-28 This monograph addresses fundamental syntactic issues of classifier constructions based on a thorough study of a typical classifier language Mandarin Chinese It shows that the contrast between count and mass is not binary Instead there are two independently attested features Numerability the ability of a noun to combine with a numeral directly and Delimitability the ability of a noun to be modified by a delimitive modifier such as size shape or boundary modifier Although all nouns in

Chinese are non count nouns there is still a mass non mass contrast with mass nouns selected by individuating classifiers and non mass nouns selected by individual classifiers Some languages have the counterparts of Chinese individuating classifiers only some languages have the counterparts of Chinese individual classifiers only and some other languages have no counterpart of either individual or individuating classifiers of Chinese The book also reports that unit plurality can be expressed by reduplicative classifiers in the language Moreover for the constituency of a numeral expression an individual individuating or kind classifier combines with the noun first and then the numeral is integrated but a partitive or collective classifier like a measure word combines with the numeral first before the noun is integrated into the whole nominal structure Furthermore the book identifies the syntactic positions of various uses of classifiers in the language A classifier is at a functional head position that has a dependency with a numeral or a position that has a dependency with a generic or existential quantifier or a position that represents the singular plural contrast or a position that licenses a delimitive modifier when the classifier occurs in a compound

Translanguaging as Everyday Practice Gerardo Mazzaferro, 2018-10-04 This volume offers empirically grounded perspectives on translanguaging as a locally situated interactional accomplishment of practical action and its significance within different domains of social life school education diasporic families and communities workplaces urban linguistic landscapes advertising practices and mental health centres focusing on case studies from different countries and continents The 14 chapters contribute to the understanding of translanguaging as a communicative and discursive practice which is relationally constructed and strategically deployed by individuals during everyday encounters with language and cultural diversity The contributions testify to translanguaging as an interdisciplinary and critical research paradigm by assembling scholars working on translanguaging from different perspectives and a wide range of social cultural and geographical contexts This volume contributes to the further development of new theoretical and analytical tools for the investigation of translanguaging as everyday practice and how and why language practices are constructed negotiated opposed or subverted by social actors
