Automorphisms of Fusion Systems of Finite Simple Groups of Lie Type Carles Broto, Jesper M. Møller, Bob Oliver, 2020-02-13 For a finite group G of Lie type and a prime p the authors compare the automorphism groups of the fusion and linking systems of G at p with the automorphism group of G itself When p is the defining characteristic of G they are all isomorphic with a very short list of exceptions When p is different from the defining characteristic the situation is much more complex but can always be reduced to a case where the natural map from $\text{Out } G$ to outer automorphisms of the fusion or linking system is split surjective This work is motivated in part by questions involving extending the local structure of a group by a group of automorphisms and in part by wanting to describe self homotopy equivalences of BG_p in terms of $\text{Out } G$
