Seminar On Micro Local Analysis:

Seminar on Micro-local Analysis Victor Guillemin, Masaki Kashiwara, Takahiro Kawai, 1979-11-21 Based on a seminar sponsored by the Institute for Advanced Study in 1977 1978 this set of papers introduces micro local analysis concisely and clearly to mathematicians with an analytical background The papers treat the theory of microfunctions and applications such as boundary values of elliptic partial differential equations propagation of singularities in the vicinity of degenerate characteristics holonomic systems Feynman integrals from the hyperfunction point of view and harmonic analysis on Lie groups

Seminar on Micro-Local Analysis Victor Guillemin, Masaki Kashiwara, Takahiro Kawai, 2016-03-02 Based on a seminar sponsored by the Institute for Advanced Study in 1977 1978 this set of papers introduces micro local analysis concisely and clearly to mathematicians with an analytical background The papers treat the theory of microfunctions and applications such as boundary values of elliptic partial differential equations propagation of singularities in the vicinity of degenerate characteristics holonomic systems Feynman integrals from the hyperfunction point of view and harmonic analysis on Lie groups

New Trends in Microlocal Analysis J.-M. Bony, M. Morimoto, 2012-12-06 Microlocal analysis began around 1970 when Mikio Sato along with coauthors Masaki Kashiwara and Takahiro Kawai wrote a decisive article on the structure of pseudodifferential equations thus laying the foundation of $\mathcal{D}$ modules and the singular spectrums of hyperfunctions The key idea is the analysis of problems on the phase space i.e the cotangent bundle of the base space Microlocal analysis is an active area of mathematical research that has been applied to many fields such as real and complex analysis representation theory topology number theory and mathematical physics This volume contains the presentations given at a seminar jointly organized by the Japan Society for the Promotion of Science and Centre National des Recherches Scientifiques entitled New Trends in Microlocal Analysis The book is divided into three parts partial differential equations and mathematical analysis mathematical physics and algebraic analysis $\mathcal{D}$ modules and sheave theory The large variety of new research that is covered will prove invaluable to students and researchers alike

Microlocal Analysis and Applications Lamberto Cattabriga, Luigi Rodino, 2006-11-14 CONTENTS J M Bony Analyse microlocale des equations aux derivees partielles non lineaires G G Grubb Parabolic pseudo differential boundary problems and applications L H Rmander Quadratic hyperbolic operators H Komatsu Microlocal analysis in Gevrey classes and in complex domains J Sj strand Microlocal analysis for the periodic magnetic Schr dinger equation and related questions

Fundamentals of Algebraic Microlocal Analysis Goro Kato, Daniele C Struppa, 2020-08-11 Provides a thorough introduction to the algebraic theory of systems of differential equations as developed by the Japanese school of M Sato and his colleagues Features a complete review of hyperfunction microfunction theory and the theory of $\mathcal{D}$ modules Strikes the perfect balance between analytic and algebraic aspects

Microlocal Analysis and Inverse Problems in Tomography and Geometry Eric Todd

Quinto, Plamen D. Stefanov, Gunther Uhlmann, 2024-09-23 Microlocal Analysis has proven to be a powerful tool for analyzing and solving inverse problems including answering questions about stability uniqueness recovery of singularities etc This volume presents several studies on microlocal methods in problems in tomography integral geometry geodesic transforms travel time tomography thermoacoustic tomography Compton CT cosmology nonlinear inverse problems and others

Advances in Microlocal Analysis H.G. Garnir, 2012-12-06 The 1985 Castelvecchio Pascoli NATO Advanced Study Institute is aimed to complete the trilogy with the two former institutes I organized Boundary Value Problem for Evolution Partial Differential Operators Liege 1976 and Singularities in Boundary Value Problems Maratea 1980 It was indeed necessary to record the considerable progress realized in the field of the propagation of singularities of Schwartz Distributions which led recently to the birth of a new branch of Mathematical Analysis called Microlocal Analysis Most of this theory was mainly built to be applied to distribution solutions of linear partial differential problems A large part of this institute still went in this direction But on the other hand it was also time to explore the new trend to use microlocal analysis In nonlinear differential problems I hope that the Castelvecchio NATO ASI reached its purposes with the help of the more famous authorities in the field The meeting was held in Tuscany Italy at Castelvecchio Pascoli little village in the mountains north of Lucca on September 2-12 1985 It was hosted by 11 Ciocco an international vacation Center In a comfortable hotel located in magnificent mountain surroundings and provided with all conference and sport facilities Nonlinear Theory of Generalized Functions Michael Oberguggenberger, Michael Grosser, Michael Kunzinger, Gunther Hormann, 2022-02-27

Questions regarding the interplay of nonlinearity and the creation and propagation of singularities arise in a variety of fields including nonlinear partial differential equations noise driven stochastic partial differential equations general relativity and geometry with singularities A workshop held at the Erwin Schrödinger International Institute for Mathematical Physics in Vienna investigated these questions and culminated in this volume of invited papers from experts in the fields of nonlinear partial differential equations structure theory of generalized functions geometry and general relativity stochastic partial differential equations and nonstandard analysis The authors provide the latest research relevant to work in partial differential equations mathematical physics and nonlinear analysis With a focus on applications this book provides a compilation of recent approaches to the problem of singularities in nonlinear models The theory of differential algebras of generalized functions serves as the central theme of the project along with its interrelations with classical methods

Microlocal Analysis and Complex Fourier Analysis Keiko Fujita, Takahiro Kawai, 2002 This book is a collection of original papers on microlocal analysis Fourier analysis in the complex domain generalized functions and related topics Most of the papers originate from the talks given at the conference OC Prospects of Generalized Functions OCO in November 2001 at RIMS Kyoto Reflecting the fact that the papers except M Morimoto's one are dedicated to Mitsuo Morimoto the subjects considered in this book are interdisciplinary just as Morimoto's works are The historical backgrounds of the subjects are also

discussed in depth in some contributions Thus this book should be valuable not only to the specialists in the fields but also to those who are interested in the history of modern mathematics such as distributions and hyperfunctions
