Seminar on Stochastic Processes 1990 Cinlar, 2014-01-15 *Seminar on Stochastic Processes, 1991* E. Cinlar, K.L. Chung, M. Sharpe, 2012-12-06 The 1991 Seminar on Stochastic Processes was held at the University of California Los Angeles from March 23 through March 25 1991 This was the eleventh in a series of annual meetings which provide researchers with the opportunity to discuss current work on stochastic processes in an informal and enjoyable atmosphere Previous seminars were held at Northwestern University Princeton University the University of Florida the University of Virginia the University of California San Diego and the University of British Columbia Following the successful format of previous years there were five invited lectures These were given by M Barlow G Lawler P March D Stroock M Talagrand The enthusiasm and interest of the participants created a lively and stimulating atmosphere for the seminar Some of the topics discussed are represented by the articles in this volume P J Fitzsimmons T M Liggett S C Port Los Angeles 1991 In Memory of Steven Orey M CRANSTON The mathematical community has lost a cherished colleague with the passing of Steven Orey This unique and thoughtful man has left those who knew him with many pleasant memories He has also left us with important contributions in the development of the theory of Markov processes As a friend and former student I wish to take this chance to recall to those who know and introduce to those who do not a portion of his lifework **Seminar on Stochastic Processes, 1990** Cinlar, 1991-04-01 The 1990 Seminar on Stochastic Processes was held at the University of British Columbia from May 10 through May 12 1990 This was the tenth in a series of annual meetings which provide researchers with the opportunity to discuss current work on stochastic processes in an informal and enjoyable atmosphere Previous seminars were held at Northwestern University Princeton University the University of Florida the University of Virginia and the University of California San Diego Following the successful format of previous years there were five invited lectures delivered by M Marcus M Vor D Nualart M Freidlin and L C G Rogers with the remainder of the time being devoted to informal communications and workshops on current work and problems The enthusiasm and interest of the participants created a lively and stimulating atmosphere for the seminar A sample of the research discussed there is contained in this volume The 1990 Seminar was made possible by the support of the Natural Sciences and Engineering Research Council of Canada the Southwest University Mathematics Society of British Columbia and the University of British Columbia To these entities and the organizers of this year's conference Ed Perkins and John Walsh we extend our thanks Finally we acknowledge the support and assistance of the staff at Birkhauser Boston **Seminar on Stochastic Processes, 1990** Erhan Çinlar, Ruth J. Üstünel, 2012-12-06 One of the most challenging subjects of stochastic analysis in relation to physics is the analysis of heat kernels on infinite dimensional manifolds The simplest nontrivial case is that of the path and loop space on a Lie group In this

volume an up to date survey of the topic is given by Leonard Gross a prominent developer of the theory Another concise but complete survey of Hausdorff measures on Wiener space and its applications to Malliavin Calculus is given by D Feyel one of the most active specialists in this area Other survey articles deal with short time asymptotics of diffusion processes with values in infinite dimensional manifolds and large deviations of diffusions with discontinuous drifts A thorough survey is given of stochastic integration with respect to the fractional Brownian motion as well as Stokes formula for the Brownian sheet and a new version of the log Sobolev inequality on the Wiener space Professional mathematicians looking for an overview of the state of the art in the above subjects will find this book helpful In addition graduate students as well as researchers whose domain requires stochastic analysis will find the original results of interest for their own research The organizers acknowledge gratefully the financial help of the University of Oslo and the invaluable aid of Professor Bernt Oksendal and l Ecole Nationale Supérieure des Telecommunications

The Dynkin Festschrift Mark I. Freidlin, 2012-12-06

Onishchik A A Kirillov and E B Vinberg who obtained their first results on Lie groups in Dynkin's seminar At a later stage the work of the seminar was greatly enriched by the active participation of I I Pyatetskii Shapiro As already noted Dynkin started to work in probability as far back as his undergraduate studies In fact his first published paper deals with a problem arising in Markov chain theory The most significant among his earliest probabilistic results concern sufficient statistics In 15 and 17 Dynkin described all families of one dimensional probability distributions admitting non trivial sufficient statistics These papers have considerably influenced the subsequent research in this field But Dynkin's most famous results in probability concern the theory of Markov processes Following Kolmogorov Feller Doob and Ito Dynkin opened a new chapter in the theory of Markov processes He created the fundamental concept of a Markov process as a family of measures corresponding to various initial times and states and he defined time homogeneous processes in terms of the shift operators
