in a Shell Thom van Dooren,2023-10-17 Following the trails of Hawai i s snails to explore the simultaneously biological and
cultural significance of extinction In this time of extinctions the humble snail rarely gets a mention And yet snails are
disappearing faster than any other species In *A World in a Shell* Thom van Dooren offers a collection of snail stories from
Hawai i once home to more than 750 species of land snails almost two thirds of which are now gone Following snail trails
through forests laboratories museums and even a military training facility and meeting with scientists and Native Hawaiians
van Dooren explores ongoing processes of ecological and cultural loss as they are woven through with possibilities for hope
care mourning and resilience Van Dooren recounts the fascinating history of snail decline in the Hawaiian Islands from
deforestation for agriculture timber and more through the nineteenth century shell collecting mania of missionary settlers
and on to the contemporary impacts of introduced predators Along the way he asks how both snail loss and conservation
efforts have been tangled up with larger processes of colonization militarization and globalization These snail stories provide
a potent window into ongoing global process of environmental and cultural change including the largely unnoticed
disappearance of countless snails insects and other less charismatic species Ultimately van Dooren seeks to cultivate a sense
of wonder and appreciation for our damaged planet revealing the world of possibilities and relationships that lies coiled
within a snail s shell
