Sensing Corporeally Toward A Posthuman Understanding:

Sensing Corporeally Floyd Merrell, 2003-01-01 Focusing on analogical sensing rather than digital reasoning Merrell argues that human sensation and cognition should be thought of in terms of continually changing signs that can be accounted for in terms of topological forms

Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma Mohammad H. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schr dinger s Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary

us to understand the human universe no less than the physical universe Just as my *Creating Life Before Death* challenges bureaucracy's conformist orientation so does *Liberating Sociology* liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

Posthuman Pathogenesis Başak Ağın, Şafak Horzum, 2022-07-07 This multi vocal assemblage of literary and cultural responses to contagions provides insights into the companionship of posthumanities environmental humanities and medical humanities to shed light on how we deal with complex issues like communicable diseases in contemporary times Examining imaginary and real contagions ranging from Jeep and SHEVA to plague HIV AIDS and COVID 19 *Posthuman Pathogenesis* discusses the inextricable links between nature and culture matter and meaning making practices and the human and the nonhuman Dissecting pathogenic nonhuman bodies in their interactions with their human counterparts and the environment the authors of this volume raise their diverse voices with two primary aims to analyse how contagions trigger a drive to survival and chaotic liberating and captivating impulses and to focus on the viral interpolations in socio political and environmental systems as a meeting point of science technology and fiction blending social reality and myth Following the premises of the post qualitative turn and presenting a differentiated experience of contagion this rhizomatic compilation thus offers a non hierarchised array of essays composed of a multiplicity of genders geographies and generations

Returning Learning Simone M. Blom, 2024-12-30 *Returning Learning* explores early school years teachers perceptions of nature and how this informs their pedagogy through a posthuman theoretical framework The theoretical framework is purposefully designed to disrupt dichotomies and reject abuse to marginalised others In doing so this book offers a reconceptualisation of learning in environmental education and education more broadly The posthuman theoretical framework is a transdisciplinary offering informed by material discursive practices affective atmospheres and childhood nature The theoretical framework and transqualitative methodology support diffractive ethnographic methods where data are generated through an iterative and entangled data collection and data analysis process This process is presented as a series of diffractive data entanglements that explore teachers perceptions of nature their pedagogical practices and the implications of these data through a posthuman framing These non conventional approaches to undertaking research are the foundation for this book that listens to teacher's voices by conducting research with teachers rather than to teachers Through a deep exploration into the intricacies of everyday classroom practices and happenings this book privileges the voices of the teachers and the nonhuman thus the response ability of teachers to their students and the planet is returned It will be of interest to researchers who are interested in creative and innovative theories and methodologies as well as those studying environmental education and

Petrilli, 2017-07-28 Ostentation of the Subject is a practice that is asserting itself ever more in today's world Consequently criticism by philosophers psychologists sociologists and anthropologists has been to little effect considering that they are not immune to such practices themselves The question of subjectivity concerns the close and the distant the self and the other the other from self and the other of self It is thus connected to the question of the sign It calls for a semiotic approach because the self is itself a sign its very own relation with itself is a relation among signs This book commits to developing a critique of subjectivity in terms of the material that the self is made of that is the material of signs Susan Petrilli highlights the scholarship of Charles Peirce Mikhail Bakhtin Roland Barthes Mary Boole Jacques Derrida Michael Foucault Emmanuel Levinas Claude Levi Strauss Maurice Merleau-Ponty Charles Morris Thomas Sebeok Thomas Szasz and Victoria Welby Included are American and European theories and theorists evidencing the relationships interconnecting American Italian French and German scholarship Petrilli covers topics from identity issues that are part of semiotic views to the corporeal self as well as responsibility reason and freedom Her book should be read by philosophers semioticians and other social scientists

The Unity of Mind, Brain and World Alfredo Pereira, Jr, Dietrich Lehmann, 2013-09-12 Issues concerning the unity of minds bodies and the world have often recurred in the history of philosophy and more recently in scientific models Taking into account both the philosophical and scientific knowledge about consciousness this book presents and discusses some theoretical guiding ideas for the science of consciousness The authors argue that within this interdisciplinary context a

consensus appears to be emerging assuming that the conscious mind and the functioning brain are two aspects of a complex system that interacts with the world How can this concept of reality one that includes the existence of consciousness be approached both philosophically and scientifically The Unity of Mind Brain and World is the result of a three year online discussion between the authors who present a diversity of perspectives tending towards a theoretical synthesis aimed to contribute to the insertion of this field of knowledge in the academic curriculum
