operations experts **Nature & Science on the Pacific Coast** ,1915 **Designing Evolutionary Algorithms for Dynamic Environments** Ronald W. Morrison,2013-06-29 The robust capability of evolutionary algorithms EAs to find solutions to difficult problems has permitted them to become popular as optimization and search techniques for many industries Despite the success of EAs the resultant solutions are often fragile and prone to failure when the problem changes usually requiring human intervention to keep the EA on track Since many optimization problems in engineering finance and information technology require systems that can adapt to changes over time it is desirable that EAs be able to respond to changes in the environment on their own This book provides an analysis of what an EA needs to do to automatically and continuously solve dynamic problems focusing on detecting changes in the problem environment and responding to those changes In this book we identify and quantify a key attribute needed to improve the detection and response performance of EAs in dynamic environments We then create an enhanced EA designed explicitly to exploit this new understanding This enhanced EA is shown to have superior performance on some types of problems Our experiments evaluating this enhanced EA indicate some previously unknown relationships between performance and diversity that may lead to general methods for improving EAs in dynamic environments Along the way several other important design issues are addressed involving computational efficiency performance measurement and the testing of EAs in dynamic environments European Autonomy in Space Cenani Al-Ekabi,2015-01-07 The volume provides analyses and evaluations of the continuing importance of Europe's autonomy in its access to space as a key driver in the development of European space capabilities From a detailed historical analysis of some of the pitfalls of dependence in the space industry experts analyse the full range of current European space capabilities and identify areas where autonomy is both possible and required even in a situation of severe budgetary constraints The contributions present a comprehensive overview of European efforts in a broad range of areas including energy culture science and security access to space space applications human spaceflight security and space situational awareness and strategic issues They make a cogent strategic and economic case for policy makers to continue to bear in mind the importance of autonomous space capabilities even in an interdependent globalised world **Threats, Risks and Sustainability - Answers by Space** Kai-Uwe Schrogl,Charlotte Mathieu,Agnieszka Lukaszczuk,2009-07-24 Development is challenged by at least until 2050 a strong population more severe environmental strains growing mobility and dwindling energy resources All these factors will lead to serious consequences for humankind Inadequate agricultural resources water supply and non renewable energy sources epidemics climate change and natural disasters will further heavily impact human life The European Space Policy Institute ESPI sheds a new light on threats risks and sustainability by combining approaches from various disciplines It analyzes what could be the contribution of space tools to predict manage and mitigate those threats It aims at demonstrating that space is not a niche but has become an overarching tool in solving today's problems
