Public Health Service,1964 [Want List of Periodicals and Serials, Corrected to September 2, 1902](#) Library of Congress. Periodicals Division,1902 [Industrial Espionage and Technology Transfer](#) John R. Harris,2017-07-05 Britain and France were the leading industrial nations in 18th century Europe This book examines the rivalry which existed between the two nations and the methods used by France to obtain the skilled manpower and technology which had given Britain the edge particularly in the new coal based technologies Despite the British Act of 1719 which outlawed industrial espionage and technology transfer France continued to bring key industrial workers from Britain and to acquire British machinery and production methods Drawing on a mass of unpublished archival material this book investigates the nature and application of British laws and the involvement of some major British industrialists in these issues and discusses the extent to which French espionage had any real success In the process it presents an in depth understanding of 18th century economies and the cultures and bureaucracies which were so important in shaping economic life Above all the late John Harris saw the history of industrial espionage as one means of restoring the thoughts and activities of human beings to the centre stage of industrial history These are the stories of individuals Holkers Trudaines Wilkinsons or Milnes and their impact on the world *Operatic Geographies* Suzanne Aspden,2019-04-22 Since its origin opera has been identified with the performance and negotiation of power Once theaters specifically for opera were established that connection was expressed in the design and situation of the buildings themselves as much as through the content of operatic works Yet the importance of the opera house s physical situation and the ways in which opera and the

opera house have shaped each other have seldom been treated as topics worthy of examination Operatic Geographies invites us to reconsider the opera house s spatial production Looking at opera through the lens of cultural geography this anthology rethinks the opera house s landscape not as a static backdrop but as an expression of territoriality The essays in this anthology consider moments across the history of the genre and across a range of geographical contexts from the urban to the suburban to the rural and from the Old world to the New One of the book s most novel approaches is to consider interactions between opera and its environments that is both in the domain of the traditional opera house and in less visible more peripheral spaces from girls schools in late seventeenth century England to the temporary arrangements of touring operatic troupes in nineteenth century Calcutta to rural open air theaters in early twentieth century France The essays throughout Operatic Geographies powerfully illustrate how opera s spatial production informs the historical development of its social cultural and political functions

John Law James Buchan,2018-09-06 At the summit of his power John Law was the most famous man in Europe Born in Scotland in 1671 he was convicted of murder in London and after his escape from prison fled Scotland for the mainland when Union with England brought with it a warrant for his arrest On the continent he lurched from one money making scheme to the next selling insurance against losing lottery tickets in Holland advising the Duke of Savoy amassing a fortune of some 80 000 But for his next trick he had grander ambitions When Louis XIV died leaving a thoroughly bankrupt France to his five year old heir Law gained the ear of the Regent Philippe D Orleans In the years that followed Law s financial wizardry transformed the fortunes of France enriching speculators and investors across the continent and he was made Controller General of Finances effectively becoming the French Prime Minister But the fall from grace that was to follow was every bit as spectacular as his meteoric rise John Law by a biographer of Adam Smith and the author of *Frozen Desire* and *Capital of the Mind* dramatises the life of one of the most inventive financiers in history a man who was born before his time and in whose day the word millionaire came to be coined
