Kellermann, 1986      Star Noise: Discovering the Radio Universe Kenneth I. Kellermann, Ellen N. Bouton, 2023-05-11 Until Karl Jansky's 1933 discovery of radio noise from the Milky Way astronomy was limited to observation by visible light Radio astronomy opened a new window on the Universe leading to the discovery of quasars pulsars the cosmic microwave background electrical storms on Jupiter the first extrasolar planets and many other unexpected and unanticipated phenomena Theory generally played little or no role or even pointed in the wrong direction Some discoveries came as a result of military or industrial activities some from academic research intended for other purposes some from simply looking with a new technique Often it was the right person in the right place at the right time doing the right thing or sometimes the wrong thing Star Noise tells the story of these discoveries the men and women who

made them the circumstances which enabled them and the surprising ways in which real life scientific research works

**Radio Astronomy in Canada** Jasper Wall, Elizabeth Griffin, Richard Jarrell, 2024-12-23 Here is the tale of Canada's intriguing development of the science of Radio Astronomy In 1946 the lone figure of Arthur Covington started monitoring the radio emission of the Sun a programme that continues to this day By the 1960s Canada had progressed to constructing two radio observatories at either ends of the country the DRAO and the ARO and universities were coming onboard The story continues through the dire times for these and follows their fortunes and fates right up to the present with Canada now playing key roles in billion dollar international telescope projects It concludes with the construction and operation of Canada's own transformational telescope CHIME Anecdotes and images throughout the book liven the story The authors two practising astronomers have painstakingly put together this fascinating story drawing on first hand experiences valuable contributions from many colleagues and the research of science historian Richard Jarrell 1942 2013 This book fills a gap in the substantial literature on the history of radio astronomy Carefully researched by three experts and based on input by further experts in the field it documents the extensive scientific and especially technical innovations of Canadian scientists and engineers This includes the important Canadian absolute flux density calibrations the critical Canadian contribution to low frequency radio astronomy and VLBI and the long running solar monitoring programme Frank discussions about the excellent 46 m ARO telescope and its fate lead into considerations of Canada's contributions to recent international projects the JCMT ALMA and the upcoming SKA The book concludes with a description of CHIME Canada's own new generation radio installation Ken Kellermann Senior Scientist Emeritus National Radio Astronomy Observatory Charlottesville USA

*Beyond Southern Skies* Peter Robertson, 1992-11-09 *Beyond Southern Skies* tells the story of the planning and construction of the Parkes Telescope in rural New South Wales Australia and surveys its achievements over the past thirty years Around this central theme Peter Robertson presents a broader history of radio astronomy describing its rapid rise to become the respected partner of traditional optical astronomy The opening up of the radio window on the universe has been one of the most exciting developments in modern science The technical achievements of the telescope outlined in Peter Robertson's very readable book will be accessible to a general audience Readers will be fascinated by the lively account of the personalities politics and controversy that lay behind the decision to build the Parkes Telescope Since its completion in 1961 the telescope has contributed much to our knowledge of quasars pulsars masers supernova remnants and molecular clouds as well as the other unusual objects discovered in recent years During the 1990s the telescope will continue to play a part in our quest to understand the origin and nature of the universe and our place in it
