Renaissance eLearning Samantha Chapnick, Jimm Meloy, 2005-05-25 The same people who brought you the most widely used guide to preparing for eLearning are bringing passion back to your learning and training programs The authors culled through over 400 eLearning programs hundreds of popular entertainment pieces and interviews with over 100 people in widely disparate areas to answer a simple question

What will make eLearning have as much impact as popular culture Renaissance eLearning is the answer It has everything you need to infuse eLearning with the same magnetism and addictive powers of the typical video game song movie or other form of entertainment With this book you ll learn How to make emotion and passion as important to eLearning as cognition and intellect How and why to empower learners to take charge of their own experience How to get buy in from stakeholders for alternative and higher return on investment programs How to apply the same principles and techniques including narrative and visual design used by masters over the centuries to grab attention foster learning and have a lasting impact on participants How to get the research and information you need without relying on self proclaimed gurus and exorbitantly priced analysts How to find and work with the affordable creative talent needed to make your plans a reality **Strategy Savvy** Hesham Dinana,2022-08-11 With the COVID 19 pandemic many business leaders question the need for strategy and the value of strategic planning and management in today s environment This book will demonstrate that our approach to strategy development and implementation needs to change to be able to help organizations change The proposed new approach in this book can provide insights and perspectives to keep strategy relevant by Putting Strategy in Action through developing a Making the Future Happen Today way of thinking and living Many strategy books focus on the perspective of large multinational corporations that have the capacity and capabilities to develop and implement a strategy using very structured methodologies and tools This book will add a new dimension by focusing on the use of Strategy as Practice SaP intuition and serendipity as important complements that can be used by large corporations as well as small and medium sized enterprises SMEs and entrepreneurs to develop and implement winning strategies This is an important dimension to support the strategic decision making process that is frequently undermined in traditional strategic planning and management focused books The author theorizes that developing into a Strategy Savvy professional is about embracing two of the most important concepts in strategy development Proactivity and Sustainability This book addresses the opportunities and threats presented by VUCA Volatility Uncertainty Complexity and Ambiguity and how we can capitalize on those opportunities to create unprecedented growth opportunities in Society 5 0 that is shaping new economies such as the Digital Economy the Experience Economy the Sharing Economy the GIG Economy the Purpose Economy and the Circular Economy The author also proposes a new approach to strategy development and implementation that mixes formal planning with practice and intuition that is helped by serendipity He presents a strategy that is driven by four propellers insights culture operations and digitization to ensure arrival at a better future *Creativity* , **SNAP** Katherine Ramsland,2012-02-21 Sudden flashes of inspiration have triggered many discoveries and inventions throughout history Are such aha moments merely random or is there a way to train the brain to harness these seemingly unpredictable creative insights This fascinating overview of the latest neuroscience findings on spontaneous thought processes or snaps describes how everyone not just geniuses can learn to improve the likelihood of their own eureka moments by adopting certain rewarding attitudes and habits As the author

explains snaps are much more than new ideas Snaps are insights plus momentum they instantly compel or snap us toward action They often occur after ordinary problem solving hits an impasse We may feel stuck but while we re in a quandary the brain is rebooting Then when we least expect it the solution pops into our heads She describes the results of numerous scientific experiments studying this phenomenon She also recounts intriguing stories of people in diverse disciplines who have had a snap experience Both the research and the stories illustrate that it s possible to enhance our facility for snap moments by training ourselves to scan sift and solve In the emerging economy businesses and individuals need new strategies and it s clear that just thinking harder no longer works People who can snap are often a step ahead they have a vigilance advantage from exercising brain cells that build mental agility While snapping is rewarding fun and good for improving our mental skills it s also much more people who snap life changing ideas that affect many others will redirect our future Written in an accessible jargon free narrative that weaves together the latest research with illuminating stories of innovative people this book teaches us how to cultivate our own inner epiphanies to gain an edge in our imaginations our careers our goals indeed in every aspect of our lives

Death of a Rat William D. Stansfield, 2000-08 With this intriguing opening geneticist and science writer William D Stansfield begins this popular overview of the major ethical and philosophical issues confronting science today From concern about the welfare of experimental animals to a consideration of the many other kinds of impediments that slow the progress of science religious moral political and conceptual each accessible chapter conveys to the intelligent lay reader an appreciation for the work that scientists do and the obstacles that stand in their way With a knack for telling a good story Stansfield weaves together the history of science and contemporary events in diversely entertaining loosely connected chapters that can be read sequentially or stand on their own The Frankenstein Model considers such thorny issues as human experimentation fetal cell research and animal rights Dance Fever shows how a paradigm hold e g bee dance language can redirect scientists away from giving alternate theories a proper test Grand Illusions looks at enticing scientific ideas like cold fusion that sometimes lead scientists down the wrong path Strange Bedfellows traces the influence of religion and politics on the advance of science and on science education today Other chapters discuss the role that serendipity plays in scientific discoveries where great ideas come from J D Watson s double helix model of DNA the history of the polymerase chain reaction the discovery of the AIDS virus and the crucial issue of honesty vs fraud in scientific research At times dramatic amusing and always interesting The Death of a Rat proves that science is much more than the dry antiseptic exercise of popular stereotypes William Stansfield compellingly describes the fascinating very human struggle for truth that makes science the most important enterprise of our time

Scientific Knowledge and the Transgression of Boundaries Bettina-Johanna Krings, Hannot Rodríguez, Anna Schleisiek, 2016-11-30 The aim of this book is to understand and critically appraise science based transgression dynamics in their whole complexity It includes contributions from experts with different disciplinary backgrounds such as philosophy history and sociology Thus

it is in itself an example of boundary transgression Scientific disciplines and their objects have tended to be seen as permanent and distinct However science is better conceived as an activity that constantly surpasses erases and rebuilds all kinds of boundaries either disciplinary socio ethical or ecological This transgressive capacity a characteristic trait of science and its applications defines us as knowledge societies However scientific and technological developments are also sources of serious environmental and social concerns

Collective Wisdom Hélène Landemore,Jon Elster,2012-07-16 James Madison wrote Had every Athenian citizen been a Socrates every Athenian assembly would still have been a mob The contributors to this volume discuss and for the most part challenge this claim by considering conditions under which many minds can be wiser than one With backgrounds in economics cognitive science political science law and history the authors consider information markets the internet jury debates democratic deliberation and the use of diversity as mechanisms for improving collective decisions At the same time they consider voter irrationality and paradoxes of aggregation as possibly undermining the wisdom of groups Implicitly or explicitly the volume also offers guidance and warnings to institutional designers
