Serial Verb Constructions A Crosslinguistic Typology:

Serial Verb Constructions Aleksandra IľUľr'evna Aikhenval'd, R.M.W. Dixon, 2006 A serial verb construction is a sequence of verbs which acts together as one This outstanding book is the first to study the phenomenon across languages of different typological and genetic profiles The authors all experienced linguistic fieldworkers follow a unified typological approach and avoid formalisms

Serial Verb Constructions Aleksandra IľUľr'evna Aikhenval'd, Robert M. W. Dixon, 2023 A serial verb construction is a sequence of verbs which acts together as one The authors examine form and function of serial verbs and also explore the phenomenon across languages of different typological and genetic profiles

Serial Verbs Aleksandra IľUľr'evna Aikhenval'd, 2018 This book provides an in depth typological account of the forms functions and histories of serial verb constructions in which several verbs combine to form a single predicate It uses an inductively based framework for the analysis and draws on data from languages with different typological profiles and genetic affiliations

Serial Verbs in White Hmong Nerida Jarkey, 2015-06-02 In *Serial Verbs in White Hmong* Nerida Jarkey investigates verb serialization a highly productive grammatical strategy in this dynamic Southeast Asian language in which multiple verbs are simply concatenated within a single clause to depict a single event The investigation identifies four major types of serial verb construction SVC in White Hmong and finds that the key function of all these types is to depict a single event in an elaborate and vivid way a much favoured method of description in this language These findings concerning the nature and function of SVCs in White Hmong contribute to broader discussions on the nature of events as both cognitive and cultural constructs

Multi-verb Constructions Alexandra Aikhenvald, Pieter Muysken, 2010-12-17 One of the most complex topics in the study of the indigenous languages of the Americas and indeed in the study of any language set is the complex behaviour of multi verb constructions In many languages several verbs can co occur in a sentence forming a single predicate This book contains a first survey of such constructions in languages of North Middle and South America Though it is not a systematic typological survey the combined insights from the various chapters give a very rich perspective on this phenomenon involving a host of typologically diverse constructions including serial verb constructions auxiliaries co verbs phasal verbs incorporated verbs etc Aikhenvald's long introduction puts the chapters into a single perspective

A Grammar of Kilmeri Claudia Gerstner-Link, 2018-09-24 This book is a description of Kilmeri a language of Papua New Guinea based on the author's fieldwork The volume is dedicated to the detailed description of form and meaning and their interface which is supported through extensive illustration by examples The narrative structure of entire texts is accessible via a small collection of fully glossed personal and traditional stories included in the Online Supplement The typological evaluation of selected properties of Kilmeri rounds out the description of the language

The Oxford Handbook of Polysynthesis Michael Fortescue, Michael D. Fortescue, Marianne Mithun, Nicholas Evans, 2017 This handbook offers an extensive crosslinguistic and cross theoretical survey of polysynthetic languages in which single multi morpheme verb forms can express what would be

whole sentences in English These languages and the problems they raise for linguistic analyses have long featured prominently in language descriptions and yet the essence of polysynthesis remains under discussion right down to whether it delineates a distinct coherent type rather than an assortment of frequently co occurring traits Chapters in the first part of the handbook relate polysynthesis to other issues central to linguistics such as complexity the definition of the word the nature of the lexicon idiomaticity and to typological features such as argument structure and head marking Part two contains areal studies of those geographical regions of the world where polysynthesis is particularly common such as the Arctic and Sub Arctic and northern Australia The third part examines diachronic topics such as language contact and language obsolescence while part four looks at acquisition issues in different polysynthetic languages Finally part five contains detailed grammatical descriptions of over twenty languages which have been characterized as polysynthetic with special attention given to the presence or absence of potentially criterial features

A Grammar of Maonan Tian Qiao Lu, 2008 Maonan is a Kam Tai Tai Kadai language spoken by 75 000 people in the border area of Guangxi and Guizhou provinces of China This grammar book is the first volume to account for the phonology word formation syntax grammaticalization and lexicalization patterns of Maonan from a typological and ethno linguistic perspective It renders a comprehensive description of Maonan with analysis of the neutralization of semantic macroroles and the dialectic interrelations between subject and topic Particular attention is paid to the interplay between syntactic and semantic valencies The detailed analysis of the Maonan aspects is also unprecedented It examines Maonan tone sandhi from a totally new approach The book also gives a full description of the clause final particles of Maonan

Complex Predicates Mengistu Amberber, Brett Baker, Mark Harvey, 2010-04-22 Complex predicates are multipredicational but monoclausal structures They have proven problematic for linguistic theory particularly for proposed distinctions between the lexicon morphology and syntax This volume focuses on the mapping from morphosyntactic structures to event structure and in particular the constraints on possible mappings The volume showcases the coverb construction a complex predicate construction which though widespread has received little attention in the literature The coverb construction contrasts with more familiar serial verb constructions The coverb construction generally maps only to event structures like those of monomorphemic verbs whereas serial verb constructions map to a range of event structures differing from those of monomorphemic verbs The volume coverage is truly cross linguistic including languages from Australia Papua New Guinea Southeast Asia the Indian subcontinent East Africa and North America The volume establishes a new arena of research in event structure syntax and cross linguistic typology

A Grammar of Goemai Birgit Hellwig, 2011-09-29 This is the first description of Goemai a West Chadic language of Nigeria Goemai is spoken in a language contact area and this contact has shaped Goemai grammar to the extent that it can be considered a fairly untypical Chadic language The grammar presents the structure of the present day language relates it to its diachronic sources and adds a semantic perspective to the description
