New Internationalism:

Globalization, Social Movements, and the New Internationalism Peter Waterman, 2010-06-15 In a political climate where loose talk of a third way passes for political idealism Waterman's passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity The author examines the past internationalism of Labour and socialists and the present one of radical democratic social movements discussing how the Left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems

Labour Internationalism in the Global South Robert O'Brien, 2019-01-03 Labour internationalism is often viewed as impossible or inevitable depending upon political perspective O'Brien argues for a more nuanced diverse understanding of labour internationalism identifying six different faces shaped by the national or global orientation of particular groups in the fields of production regulation and ideas Providing a general view of labour's global activity and a case study of the Southern Initiative on Globalisation and Trade Union Rights SIGTUR the book illustrates how the productive and regulatory structures of the global economy are pushing labour internationalism in particular directions It details how leftist unions in Argentina Australia Brazil India the Philippines South Africa and South Korea have tried to bridge their differences and launch collective actions Drawing upon twenty years of participant observation O'Brien reveals a specific Global South approach based upon anti imperialism anti capitalism and empathetic internationalism

The Emergence Of The Nio Ideology Craig Murphy, 2019-07-11 This study traces the political history of the ideas underlying Third World calls for a New International Economic Order Filling a significant gap in the literature the book shows that NIEO ideology has a direct unbroken line of development extending back to World War II when a new international economic order the Bretton Woods system was created Dr Murphy maintains that NIEO ideology is not rooted only in Third World acceptance of Prebisch's views on trade rather it evolved from Third World attempts to cope with problems and opportunities that emerged as the Bretton Woods system was created operated and began to break down By the 1970s the ideology had become a complex and coherent analysis of the economic position of Third World states including a political analysis of how Third World views could be made dominant Many of Dr Murphy's conclusions challenge the conventional wisdom about the Third World position of the NIEO In addition his study offers insight into the relatively unexplored area of how changes in political and social consciousness affect international systems and provides grounds on which officials from both the South and the North can see the others views as less alien
