

Mental Math 10 More

Adding 10 more can be done quickly in your head, because when you add ten more, you are only adding one to the tens column. This is because the number ten is one ten and zero ones. There are never any ones to add!

$$36 + 10 =$$

You can count up by ones on your fingers – 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46.

You can add a group of ten to your base ten blocks to get 46.

While your fingers are always with you, the base ten blocks aren't. But it would be much faster to think of adding 10 using a hundreds chart rather than always counting on your fingers. Once you get used to using the hundreds chart, you will be able to add 10's in your head very quickly!

Using the hundreds chart, find 36. Then increase by ten by going down an entire row. Much faster!

Even faster would be to add one in your head to the tens column.

Just add 1  36

Three tens (30) plus one ten (10) equals 4 tens (40). You never have to change the ones, so they stay the same.

The answer is 46.
