Early Child Care in India Margaret Khalakdina, 2017-03-31 In India in the second half of the twentieth century there was a vastly increased concern for the welfare of children Various developmental programs were undertaken for the improvement of children s status especially in rural families This book first published in 1979 examines these programs and considers the enormous challenge of child care under the wide variety of conditions in this vast country

Infant Feeding John Dobbing, 2012-12-06 Infant Feeding is about a controversy which fascinated the medical and scientific world as well as national and international health authorities politicians religious groups and consumer organisations for more than 11 years It often disturbed public opinion being concerned as it is with nothing less than the life and death of babies The infant food industry was directly accused of having caused a decline in breast feeding through the inappropriate marketing of breast milk substitutes The problem was said to be particularly acute in poor under developed communities because illiterate mothers were unable to understand instructions for its use water was often contaminated and in order to stretch an admittedly expensive product it was over diluted The inevitable result said the critics of industry was malnutrition gastroenteritis and increased infant mortality These were very serious charges against companies which had until then been generally considered to provide an important contribution to medical progress and child health One company was to be particularly singled out Nestl SA the Swiss multinational Perhaps it became the target because it was the longest establishment and served well as a symbol of the whole industry It is a story which is full of

confrontations intrigue and passionately held opinions based nevertheless on a sizeable body of medical science After countless twists and turns it has some sort of happy ending Yet a great deal remains to be said as will be seen throughout the book

Assessing Contributions/h M. Harvey Brenner,2019-04-10 The authors of this book provide a systematic integrated review and comparison of the contributions of sociology political science economics demography anthropology history of science and medicine psychiatry and psychology to a number of health related fields including epidemiology health services research and health policy studies The book reflects the authors attitude that multidisciplinary research efforts must be carried out in order to obtain a thorough understanding of the relationship of social science knowledge to health problems
