Handbook of Poultry Feed from Waste A.H. El Boushy,A.F.B. van der Poel,2013-04-17 The aim of this book is to help create new feedstuffs for poultry and farm animals from the agro industry and to mobilize the neglected waste as a feedstuff to lower the price of animal products such as eggs white and red meat milk etc Furthermore this book aims to contribute to the campaign against hunger in the developing world and to reduce the competition between animals and human beings for cereals and pulses Accordingly the global pollution problem will be reduced This book will be of great interest to all those involved in the animal feed and poultry industries in agricultural universities and in research establishments where animal nutrition is studied and taught *Federation Proceedings* Federation of American Societies for Experimental Biology,1984 Vols for 1942 include proceedings of the American Physiological Society *Introducing Novel Trends in the Nutrition of Monogastric Farm Animals for the Production of High-Quality Livestock Products* Vassilios Dotas,George Symeon,Karoly Dublec,Kadir Erensoy,2025-01-17 The rearing of monogastric farm animals especially pigs and poultry is one of the most significant animal husbandry activities worldwide since it contributes approximately 75% to global meat production and fully covers the needs for eggs providing animal protein sources of high nutritional and biological value Pig and poultry production has demonstrated admirable adaptability to changing international conditions and to modern consumer concerns and attitudes through its wide variety of products increased productivity and alternative production systems and feeding schemes However considerable work remains to be done in terms of research and development notably regarding to climate change welfare concerns and overall sustainability of production particularly considering the protracted energy and economic crises and the threats to food security Vitamin History, the Early Years Lee McDowell,2013-02-11 Casimer Funk 101 years ago first used the term vitamine in 1912 What were later to be known as vitamin deficiency diseases such as scurvy beriberi night blindness xerophthalmia and rickets had plagued the world at least since the existence of written records Records of medical science from antiquity attesting to human association of certain foods e g liver with either the cause or prevention of diseases are considered the nebulous beginnings of the concept of these essential nutrients The concept of a vitamin or accessory growth factor was developed in the early part of the 20th Century and for almost five decades there was an exciting era of isolation identification and synthesis of the vitamins The present book contains 10 chapters and methodically traces each vitamin from an unidentified factor to its discovery and synthesis In relation to history of nutrition vitamins are by far the most interesting class of nutrients Following the clues of the existence of each vitamin is similar to a good mystery story The early beginnings of the vitamin theory relate to reports that animals did not survive on diets of only carbohydrates fats protein and salts Beriberi was the earliest documented deficiency disorder 2697 B C High incidence of beriberi in Asian countries was due to over milling rice polished rice The subsequent research in this disease led to the discovery of vitamins

and helped to establish some of the principal features of deficiencies in general Vitamin A deficiency results the in two eye diseases of night blindness and xerophthalmia According to some of the oldest records liver cured these diseases Rickets the devastating bone disease of young children is a vitamin D deficiency The vitamin is referred to as the sunshine vitamin as it can be synthesized in the body Rickets was common in northern cities and was more rampant in industrial cities as industrial pollution prevented children from sunlight exposure Pellagra a niacin deficiency is a devastating disease that brought pain suffering and death and resulted when corn was the main food source Symptoms of the disease were referred to as the 4 D s dermatitis diarrhea dementia and death Scurvy which had been feared since ancient times resulted from diets devoid of vitamin C rich foods of fruits and vegetables Scurvy was the vitamin deficiency disease that caused the most death and suffering in recorded history A fatal anemia pernicious anemia was a vitamin B 12 deficiency The disease resulted by only consuming plant foods or lack of a factor produced by the stomach needed for absorption of the vitamin The book contains pictures of very serious consequences and magnitude of vitamin deficiency diseases Likewise the book contains levity by illustrating humorous situations on causes and cures of these diseases The purpose of the present publication is to present an in depth review of the early history of vitamins to illustrate the devastation of these diseases and also provide some levity

Author Bio The author of the book Dr Lee McDowell is a nutritional professor at the University of Florida In nutrition research he has published over 1500 scientific articles and has written 7 books Five different nutrition courses have been taught with a graduate vitamin nutrition course offered over 25 years During this time period he wrote two editions of a vitamins textbook for his graduate class and for courses at other universities Dr McDowell is a Fellow of two International Societies and has won many awards in teaching and research From one society he won the highest award available for research Morrison Award Internationally Dr McDowell is well known having made 271 different country visits since 1971 He has given over 500 major talks in 42 different countries Early Vitamin History presented in a humorous way is his most favorite topic
