Fact and Fancy in International Economic Relations Thomas Balogh,Peter Balacs,2014-05-17 Fact and Fancy in International Economic Relations An Essay on International Monetary Reform is written during 1971 2 in collaboration with Peter Balacs It is a sequel to the Theoretical Introduction to and the Historical Analysis of a collection of essays Unequal Partners This essay rebuts in particular the view that full employment and stability could be reconciled by on the one hand a combination of monetary and fiscal policies and on the other the adoption of floating or crawling or adjustable exchange rates Emphasis is placed on the importance of the given historical situation of the pattern of anticipations in determining the outcome of the readjustment process after some disruption

The New Politics of British Trade Unionism David Marsh,1992 This is an introduction to the politics of trade unionism in contemporary Britain assessing the major changes in legislation policing and attitudes since 1979 as well as the broader social and economic trends to which these have been a response

Orderly Change David M. Andrews,2011-03-15 The Bretton Woods Conference of 1944 resulted in the formation of the International Monetary Fund and World Bank and helped lay the foundation for an unprecedented expansion of international commerce Yet six decades later at the beginning of the twenty first century the central characteristics of the Bretton Woods system remain disputed and the subject of continuing public policy debate Relying on extensive access to IMF World Bank and other archives the authors show that the history of international monetary relations since Bretton Woods is one of orderly change that is change within a sturdy but supple framework Even during the years of fixed exchange rates very different practices characterized international monetary relations immediately after World War II during the 1950s and during the 1960s Later when the fixed exchange rate system collapsed underlying commitments to trade liberalization in the context of continuing national economic policy autonomy survived and even flourished However the resulting international economic order is now in grave danger the tension between states autonomy and their mutual openness has become acute as international monetary structures no longer appear capable of mediating between these objectives David M Andrews and the contributors to Orderly Change examine past transitions as a means of suggesting possible avenues for current and future policymaking

The Futures of European Capitalism Vivien Ann Schmidt,2002 Although national policies may now be more similar especially where they follow from common European policies they are not the same

The Great Economic Debate Cy Gonick,1987-01-01 In The Great Economic Debate Cy Gonick shows how economic theories work and how they don t work As economists argue in circles the closed nature of the Great Economic Debate puts Canada s future in peril Building on his provocative analysis of the strengths and flaws of classic economic theories the author takes a fresh wide ranging look at the Canadian malaise Canada s future lies not in the ornate models of conservatives post Keynesians or social democrats Gonick says but in a rejuvenation of democracy in the community and in

the workplace Eschewing traditional economic theories The Great Economic Debate expresses Cy Gonick's unique vision of economic recovery strengthening his reputation as one of Canada's most insightful political economists **The Return to Incomes Policy** Ronald Philip Dore, Robert Boyer, 1994 The future brings with it the potential divergence of economic conduct away from that purely based on the polarised efforts of either market forces or state intervention In the light of this fresh evaluation is needed both of the evolution and efficacy of incomes policies thus far as well as of proposed solutions for the future Formulation of Exchange Rate Policies in Adjustment Programs International Monetary Fund, 1985-08-15 The role of exchange rate policy in economic adjustment has been widely studied and is the subject of numerous theoretical and empirical papers produced in the Fund and elsewhere *The Nordic Varieties of Capitalism* Lars Mjoset, 2011-11-23 A comprehensive analysis of the political economy of the five Nordic countries Denmark Finland Iceland Norway and Sweden It emphasizes the variety of experiences within the Nordic realm from the dramatic collapse of Iceland's economy as the financial bubble burst in 2008 to the full employment oil economy of Norway Unions and Economic Crisis Peter Gourevitch, Andrew Martin, George Ross, Stephen Bornstein, Andrei Markovits, Christopher Allen, 2016-04-06 First published in 1984 This book represents a major study of union responses to the economic crisis of the 1970s and 1980s Abjuring governmental or managerial outlooks it argues that unions as representatives of essential producer groups would be central to the renegotiation of the economic world The work also stresses the importance of situating union responses to the crisis within the socio historical evolution of their political economies during the rise and decline of the post war economic boom The Social Democratic affiliation of unions in Britain West Germany and Sweden make them particularly comparable This title will be of interest to students of politics and economics Who governs Britain? Sam Warner, 2023-04-25 Providing fresh insights from the archival record Who governs Britain revisits the 1970-74 Conservative government to explain why the Party tried and failed to reform the system of industrial relations Designed to tackle Britain's strike problem and perceived disorder in collective bargaining the Industrial Relations Act 1971 established a formal legal framework to counteract trade union power As the state attempted to disengage from and depoliticise collective bargaining practices trade union leaders and employers were instructed to discipline industry In just three and a half years the Act contributed to a crisis of the British state as industrial unrest engulfed industry and risked undermining the rule of law Warner explores the power dynamics strategic errors and industrial battles that destroyed this attempt to tame trade unions and ultimately brought down a government and that shape Conservative attitudes towards trade unions to this day **Industrial Relations in the Future** Michael Poole, William Brown, Jill Rubery, Keith Sisson, Roger Tarling, Frank Wilkinson, 2021-12-24 First published in 1984 Industrial Relations in the Future highlights probable developments in Britain's system of industrial relations into the 1990s It also provides a basis for further and detailed analysis and debate of issues central to the nation's future Written by distinguished scholars in their respective fields the three main sections give reviews from three contrasting traditions

mainstream industrial relations industrial sociology and management and labour economics These accounts are highly complementary in the ways in which in each and every case issues of collective bargaining managerial strategy and union response and the behaviour of governments are all set against a broad backcloth of economic political and social changes The authors see the ultimate outcome as depending greatly on the policies and types of action of organised labour managements and governments and possibly of wider social movements as well This book will be an essential read for scholars and researchers of labour economics industrial sociology economics and public policy

Post-Keynesian Essays from Down Under Volume II: Essays on Policy and Applied Economics G. Harcourt, Peter Kriesler, Joseph Halevi, John Neville, 2017-03-21 Joseph Halevi G C Harcourt Peter Kriesler and J W Neville bring together a collection of their most influential papers on post Keynesian thought Their work stresses the importance of the underlying institutional framework of the economy as a historical process and therefore of path determinacy In addition their essays suggest the ultimate goal of economics is as a tool to inform policy and make the world a better place with better being defined by an overriding concern with social justice Volume II assess application and policies

Rebuilding From Within Rotstein, Abraham, 1984-01-01 In this study written in 1984 the author discusses problems and weaknesses in Canada's economy and offers solutions for improving in the future Skeptical of the benefits of free trade proposals and deeply critical of the effects of monetarism the author proposes an alternative vision of the nation's development Rotstein outlines the sorts of industrial policies that Canada must have in a balanced portfolio to better exploit the domestic market and survive in a changing global marketplace Rebuilding from Within is a clear headed response to the economic upheavals experienced in Canada in the early 1980s

The Popular and the Political Michael Prior, 2013-04-15 The failure of the left in Britain to achieve its objectives in the past and the rapidly changing nature of popular involvement in politics in recent years both suggest the need for a reappraisal of socialist strategy in the 1980s The Popular and the Political explores the need to redefine socialism in terms which extend beyond statism which has been the mark of both the social democracy of the last two Labour government and the Marxist left and which reflect the changing nature of contemporary Britain The essays presented here consider social policy in a wide range of fields health housing energy and economic planning as well as the broad questions of democratic involvement in the political process

The Merits of Flexible Exchange Rates Leo Melamed, 1988-12-29 This anthology of significant writings by eminent economists is in part a critique of the Bretton Woods system of fixed exchange rates which was very successful at the time it was instituted but which because of its rigidity failed in the end to address the economic problems of the post war era The authors suggest that the stock market crash of 1987 might not have occurred if market forces had been allowed simply to run their course in the absence of any real economic restrictions Contributors include Harry Johnson Fritz Machlup Milton Friedman Gottfried Haberler Henry Wallich Alan Greenspan Leo Melamed Jacques de Larosiére Beryl Sprinkel Michael L Mussa Martin Feldstein Jacob Frenkel Rudiger Dornbusch Morris Goldstein Rachel
