Return To The River Restoring Salmon To The Columbia River:

Return to the River Richard N. Williams, 2005-11-21 Return to the River will describe a new ecosystem based approach to the restoration of salmon and steelhead populations in the Columbia River once one of the most productive river basins for anadromous salmonids on the west coast of North America The approach of this work has broad applicability to all recovery efforts throughout the northern hemisphere and general applicability to fisheries and aquatic restoration efforts throughout the world The Pacific Northwest is now embroiled in a major public policy debate over the management and restoration of Pacific salmon The outcome of the debate has the potential to affect major segments of the region's economy river transportation hydroelectric production irrigated agriculture urban growth commercial and sport fisheries etc This debate centered as it is on the salmon in all the rivers has created a huge demand for information The book will be a powerful addition to that debate A 15 year collaboration by a diverse group of scientists working on the management and recovery of salmon steelhead trout and wildlife populations in the Pacific Northwest Includes over 200 figures with four color throughout the book Discusses complex issues such as habitat degradation juvenile survival through the hydrosystem the role of artificial production and harvest reform **Nez Perce Tribal Hatchery Program, Snake River**, 1997 *Return to the River*, 1996

Robinson, 2005-07-02 The undamming and restoration of rivers is a major component of our broader environmental movement There are ecological economic and social justice issues enveloped by initiatives involving river restorations and it's time to focus our attention on these concerns In this book Richard M Robinson reviews the removal of big concrete big earthen and low head dams along North America's larger and smaller rivers Chapters highlight issues and contradictions related to dam safety dam removals and river restoration The resulting book provides key insights into the economics and ecology of environmental restoration our water resource management and environmental justice **Fishery Bulletin**, 2012 Wild Salmonids in the Urbanizing Pacific Northwest J. Alan Yeakley, Kathleen G. Maas-Hebner, Robert M. Hughes, 2013-11-20 Wild salmon trout char grayling and whitefish collectively salmonids have been a significant local food and cultural resource for Pacific Northwest peoples for millennia The location size and distribution of urban areas along streams rivers estuaries and coasts directly and indirectly alter and degrade wild salmonid populations and their habitats Although urban and exurban areas typically cover a smaller fraction of the landscape than other land uses combined they have profound consequences for local ecosystems aquatic and terrestrial populations and water quality and quantity Hearings on the Decision-making Processes and Interagency Cooperation of the National Marine Fisheries Service Northwest Region United States.
