

Standardization of seals will also be of benefit. At present seals are made in many sizes even though some of them are not readily available! Standardization would also minimize spare part holdings.

13.4 Other Solutions

Sometimes a solution to difficult seal problems is to use a canned magnetic or electric motor with wet or dry stator, depending on the fluid handled. Vertical cantilever shaft pumps without seals are also proving popular on atmospheric tanks.

SELECTED BIBLIOGRAPHY

The published literature on mechanical seals is very extensive and rapidly growing. This short bibliography lists a number of general reviews that cover the whole field of radial face seals and, through their extensive bibliographies, provide a key to the literature on more specific aspects. In addition reference is made to two recent papers (No 6) that produce a new important evidence on the mechanism of lubrication of seal faces, and one paper (No 7) that lists a number of seal arrangements that have been used successfully on chemical process plants.

- (1) BS Nau 'Hydrodynamic lubrication in face seals', British Hydrodynamic Research Association, BHRA Report TN543, 1955. A useful review on the controversial issue of the mechanism of lubrication in face seals.
- (2) BS Nau 'Mechanical seals guide', BHRA Report TN504, 1957 A general treatment of the fundamental design principles.
