Revolution And Improvement:

Scripting Revolution Keith Michael Baker, Dan Edelstein, 2015-10-07 The Arab Spring was heralded and publicly embraced by foreign leaders of many countries that define themselves by their own historic revolutions. The contributors to this volume examine the legitimacy of these comparisons by exploring whether or not all modern revolutions follow a pattern or script. Traditionally, historians have studied revolutions as distinct and separate events. Drawing on close familiarity with many different cultures, languages, and historical transitions, this anthology presents the first cohesive historical approach to the comparative study of revolutions. This volume argues that the American and French Revolutions provided the genesis of the revolutionary script that was rewritten by Marx, which was revised by Lenin and the Bolshevik Revolution, which was revised again by Mao and the Chinese Communist Revolution. Later revolutions in Cuba and Iran improvised further. This script is once again on display in the capitals of the Middle East and North Africa, and it will serve as the model for future revolutionary movements.

Comaroff,Jean Comaroff,2009-02-15 In the second of a proposed three volume study John and Jean Comaroff continue their exploration of colonial evangelism and modernity in South Africa Moving beyond the opening moments of the encounter between the British Nonconformist missions and the Southern Tswana peoples *Of Revelation and Revolution Volume II* explores the complex transactions both epic and ordinary among the various dramatis personae along this colonial frontier The Comaroffs trace many of the major themes of twentieth century South African history back to these formative encounters The relationship between the British evangelists and the Southern Tswana engendered complex exchanges of goods signs and cultural markers that shaped not only African existence but also bourgeois modernity back home in England We see in this volume how the colonial attempt to civilize Africa set in motion a dialectical process that refashioned the everyday lives of all those drawn into its purview creating hybrid cultural forms and potent global forces which persist in the postcolonial age This fascinating study shows how the initiatives of the colonial missions collided with local traditions giving rise to new cultural practices new patterns of production and consumption new senses of style and beauty and new forms of class distinction and ethnicity As noted by reviewers of the first volume the Comaroffs have succeeded in providing a model for the study of colonial encounters By insisting on its dialectical nature they demonstrate that colonialism can no longer be seen as a one sided relationship between the conquering and the conquered It is rather a complex system of reciprocal determinations one whose legacy is very much with us today The Quality Revolution Steve Smith,1995 Over the last decade some businesses have been transformed out of all recognition using the power of the Quality concept others have failed miserably attempting to apply the same principles **Evolutionary Theory in the Social Sciences: Evolution and revolution** William M. Digital Detroit Jeff Rice, 2012-02-21 Since the 1967 riots that ripped apart the city Detroit has traditionally been viewed either as a place in ruins or a metropolis on the verge of rejuvenation In *Digital Detroit* Rhetoric and Space in the Age of the Network author Jeff Rice goes beyond the notion of Detroit as simply a city of two ideas Instead he explores the city as a web

of multiple meanings which in the digital age come together in the city's spaces to form a network that shapes the writing the activity and the very thinking of those around it Rice focuses his study on four of Detroit's most iconic places Woodward Avenue the Maccabees Building Michigan Central Station and 8 Mile covering each in a separate chapter Each of these chapters explains one of the four features of network rhetoric folksonomy the affective interface response and decision making As these rhetorical features connect they form the overall network called Digital Detroit Rice demonstrates how new media such as podcasts wikis blogs interactive maps and the Internet in general knit together Detroit into a digital network whose identity is fluid and ever changing In telling Detroit's spatial story Rice deftly illustrates how this new media as a rhetorical practice ultimately shapes understandings of space in ways that computer applications and city planning often cannot The result is a model for a new way of thinking and interacting with space and the imagination and for a better understanding of the challenges network rhetorics pose for writing *East-West Life Expectancy Gap in Europe C.*
