Ecology and Power in the Age of Empire Corey Ross, 2017 Ecology and Power in the Age of Empire provides the first wide ranging environmental history of the heyday of European imperialism from the late nineteenth century to the end of the colonial era It focuses on the ecological dimensions of the explosive growth of tropical commodity production global trade and modern resource management strategies that still visibly shape our world today and how they were related to broader social cultural and political developments in Europe s colonies Covering the overseas empires of all the major European powers Corey Ross argues that tropical environments were not merely a stage on which conquest and subjugation took place but were an essential part of the colonial project profoundly shaping the imperial enterprise even as they were shaped by it The story he tells is not only about the complexities of human experience but also about people s relationship with the ecosystems in which they were themselves embedded the soil water plants and animals that were likewise a part of Europe s empire Although it shows that imperial conquest rarely represented the signal ecological trauma that some accounts suggest it nonetheless demonstrates that modern imperialism marked a decisive and largely negative milestone for the natural environment By relating the expansion of modern empire global trade and mass consumption to the momentous ecological shifts that they entailed this book provides a historical perspective on the vital nexus of social political and environmental issues that we face in the twenty first century world

Palloix, 1969-01-01 T00:00:00+01:00 S'il est un domaine où la théorie économique laisse plus que partout ailleurs l'homme du XX^e siècle insatisfait c'est celui des relations économiques internationales Pourtant il est urgent d'analyser ces relations d'une manière nouvelle pour deux raisons La première est que l'on fait de plus en plus dépendre le développement économique du tiers monde de la seule dynamique externe c'est-à-dire de l'apport que constitueraient pour cette zone les échanges commerciaux avec les pays les plus industrialisés C'est une position paradoxale puisque l'on sait que les échanges entre pays industrialisés et pays sous-développés représentent une part croissante dans le commerce mondial De plus rien ne justifie un tel raisonnement que les faits historiques en ce qui concerne l'industrialisation des nations aujourd'hui développées démentent Il apparaît nécessaire de dégager la signification exacte de la dynamique externe par rapport à la dynamique interne La seconde raison tient au problème de savoir si la loi des coûts comparatifs réalise l'égalité ou l'inégalité des échanges et du développement économique entre zones de développement inégal c'est-à-dire si elle est un facteur d'amplification ou de correction des inégalités La théorie a longtemps soutenu que le commerce extérieur avantagerait le petit pays ou le moins industrialisé par extension L'univers économique du XX^e siècle nous offre une autre version les nations les plus faibles économiquement sont spoliées dans leurs échanges extérieurs et freinées dans leur développement économique La loi des coûts comparatifs n'est-elle pas l'instrument de domination la disposition des économies nées pour interdire tout développement économique rapide du
