including immigration demographic competition gender ratios reproductive research and children s rights The book argues that lower fertility rates are preferred by women themselves are beneficial in their own right to both women and children and should not be used as a bargaining chip in any other area of the development debate Drawing on a large body of research in anthropology child psychology and population studies the book presents evidence that the poor do not necessarily have large families as form of financial security or to put them to work people without offspring are less lonely in old age immigration and refugee controls in the Northern Hemisphere have been more driven by politics than rational calculation and human rights social security does not require a large cohort of young workers This book is a challenging contribution to the development debate It presents a persuasive case for policies which recognise hopeful trends in relieving the environmental and social pressures of a globally increasing population *Foreign Affairs* Edmund Dene Morel, Helena Maria
