Developing the Mekong Evelyn Goh, 2013-01-11 In Southeast Asia China's growing economic and political strength has been accompanied by adept diplomacy and active promotion of regional cooperation institutions and integration Southeast Asian states and China engage in strategic regionalism they seek regional membership for regime legitimation and collective bargaining and regional integration to enhance economic development regarded as essential for ensuring national and regime security Sino Southeast Asian regionalism is exemplified by the development plans for the Mekong River basin where ambitious projects for building regional infrastructural linkages and trade contribute to mediating the security concerns of the Mekong countries However Mekong regionalism also generates new insecurities Developing the resources of the Mekong has led to serious challenges in terms of governance distribution and economic externalities Resource allocation and exploitation conflicts occur most obviously within the realm of water projects especially hydropower development programmes While such disputes are not likely to erupt into armed conflict because of the power asymmetry between China and the lower Mekong states they exacerbate Southeast Asian concerns about China's rise and undermine Chinese rhetoric about peaceful development But the negative security consequences of developing the Mekong are also due to the shared economic imperative and the Southeast Asian states own difficulties with collective action due to existing intramural conflicts

Financial Fragility and Instability in Indonesia Yasuyuki Matsumoto, 2007-01-24 This highly relevant study provides an incisive analysis of a critical phase in recent East Asian financial history exploring the underlying causes of the financial crisis that struck Indonesia during the second half of 1997 Matsumoto s extensive commercial experience in Indonesian finance during these critical years allows him to skilfully argue that the roots of the crisis lay in the period of capital liberalization undertaken during the boom years from 1994 to 1997 which encouraged the development of fragile and unstable financial structures involving increased corporate leverage reliance on external debt and the introduction of riskier and more complicated financial instruments and transactions In

depth fieldwork data and four detailed case studies illuminate the microeconomic foundations of the crisis showing how Indonesian capitalists sought to liquidate their Indonesian assets without losing control of their corporate empires by taking advantage of increased access to foreign loans and complex financial re engineering actions which ultimately precipitated instability and crisis throughout the entire financial system Finally it reflects upon the policy implications of this episode putting forward the case for comprehensive capital controls for open and developing economies until they establish appropriate financial institutions to monitor and manage the level of indebtedness and the volatility of capitalists behaviour
